Help keep your workforce safe
AT&T Staff Alert

AT&T Business

Over 25,000 alert devices in use and installed in 400+ locations

Worker safety is critical to your success.

AT&T Staff Alert is an alert and monitoring solution used by organizations that helps keep their employees safe. AT&T Staff Alert is a wearable safety device that provides micro-location alerts via to identified onsite responders via SMS text message and in the web-based dashboard. The device communicates over a secure, autonomous network installed combining beacon technology with cellular technology and does not need to integrate with your existing IT infrastructure. AT&T Staff Alert is configurable to your workforce needs providing an end-to-end AT&T managed solution with customer support (tier 1-3) and professional installation.

Solution defined

Workers carry a portable, lightweight device with an LED light and audible alert. Each room is equipped with a standalone Bluetooth (BLE) beacon solution on a dedicated, low bandwidth network which does not need to connect to an existing Wi-Fi network. Precision tracking only activates when the button is pressed, preserving battery life, and ensuring the employee is not continuously being monitored.

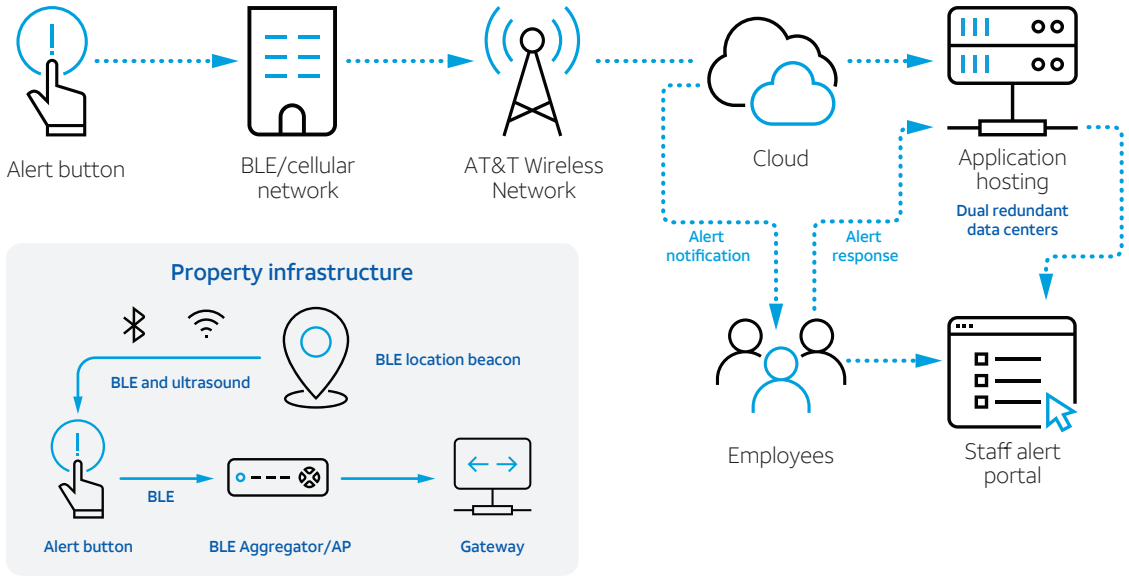
AT&T Staff Alert employs a web-based portal allowing your team to monitor location-based incident alerts and responses as well as outcomes on user friendly dashboards. Optional enhancements available include asset locator, temperature monitor, and water detector.

Potential benefits

- Provide employees with a personal security solution and room-level location accuracy
- Increase property value and brand image
- Minimize employee turnover and reduce worker incidents
- Onboard easily with no need for existing Wi-Fi
- Leverage a universal IoT extensible profile to execute multiple use cases

AT&T Business

Solution architecture



Features

- **Precision location-based alert and safety solution for workers** via Bluetooth and ultrasound
- **Ergonomically designed devices** with workplace functionality in mind
- **Leverages standardized BLE sensors** providing solution flexibility
- **Highly-secure, stand-alone communication solution**—doesn't add network congestion
- **Extended battery measured in months or years** (low power, LoRa/BLE, LTE-M, NBIoT)
- **Captures detailed operational information** to act on including who, when, and where
- **Receive real time alerts** by mobile device via text message or portal website
- User portal website with **customizable features**
- **Maintain power accessibility** with outlet conservation
- **Fully monitored end-to-end solution with 24x7 support,** fully managed tier 1-3

Why AT&T

Technology is complex. Transformation is fast. It can be hard to know you're making the right connectivity choices. We bring a rich understanding of your evolving business to deliver the right insights, guidance, and solutions.
