AT&T Office@Hand is a cloud-based solution that provides voice, fax, text messaging, collaboration tools, and audio and video conferencing so workers can be more productive **in the office or on the go.**

Keep growing your business with a **simple, secure solution** that gives you an always-on way to communicate with your customers. When they call your company's main number, they can connect to the right employee so **you never miss a call.**

6 benefits for your business

You can:

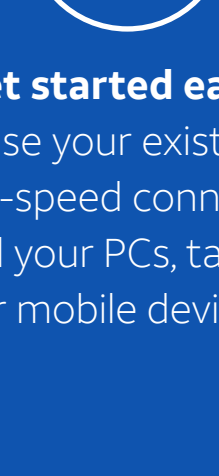

Unite a dispersed workforce.
One solution provides voice and collaboration.

Enhance customer satisfaction.
Let customers reach you, so you never miss a call.

Empower employees.
They can work wherever they are – on the devices they prefer to use.

Focus on running your business.
Rely on an easy-to-use phone, fax, messaging, and conferencing system.

Count on a low monthly fee.
Enjoy limited hardware expense.

Get started easily.
Use your existing high-speed connection and your PCs, tablets, or mobile devices.

Use case 1 **Retail**

Problem

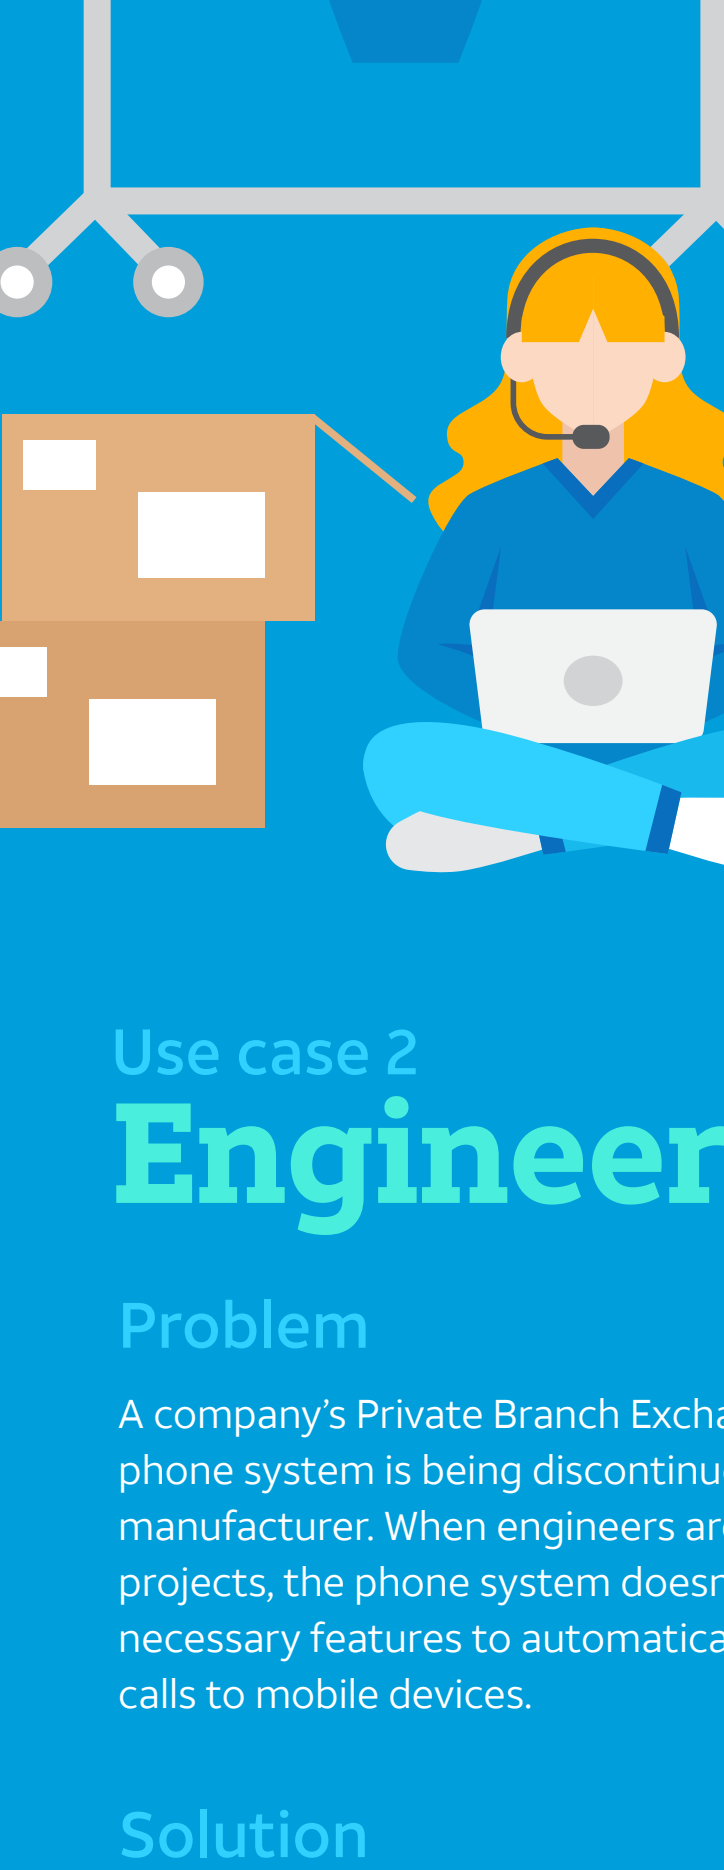

Retail establishments can have hundreds of locations on different communication platforms. It's hard to monitor sales performance across locations.

Solution

Moving business communications to the cloud can connect locations and improve collaboration. AT&T Office@Hand enables you to record inbound and outbound user calls.

Outcome

Retailers can use recorded calls to help improve sales performance from staff across the organization.

Use case 2 **Engineering**

Problem

A company's Private Branch Exchange (PBX) phone system is being discontinued by the manufacturer. When engineers aren't out on field projects, the phone system doesn't have the necessary features to automatically forward calls to mobile devices.

Solution

AT&T Office@Hand replaces the aging phone system and introduces call features that allow for sequential or simultaneous routing of calls.

Outcome

A single platform improves efficiencies. Engineers can receive calls on mobile devices virtually anywhere.
