

AT&T Dynamic Defense[®] and AT&T Business Fiber[®]

Built-in, proactive threat protection for seamless security
and connectivity

Dynamic Defense features

- Proactive threat detection and blocking
- Expert technical support
- Easy to deploy with no extra equipment required
- User-friendly dashboard for real-time visibility into threats and network performance
- Multiple security tools consolidated into one

Dynamic Defense benefits

- Stops threats before they reach your network, helping to safeguard data and operations
- Preserves network speed and performance by minimizing security-related slowdowns
- Simplifies security management, freeing up your team to focus on your business
- Builds customer trust with reliable, always-on security
- Scales easily to complement existing IT workflows and security layers

Stop threats before they hit your business

Built-in protection

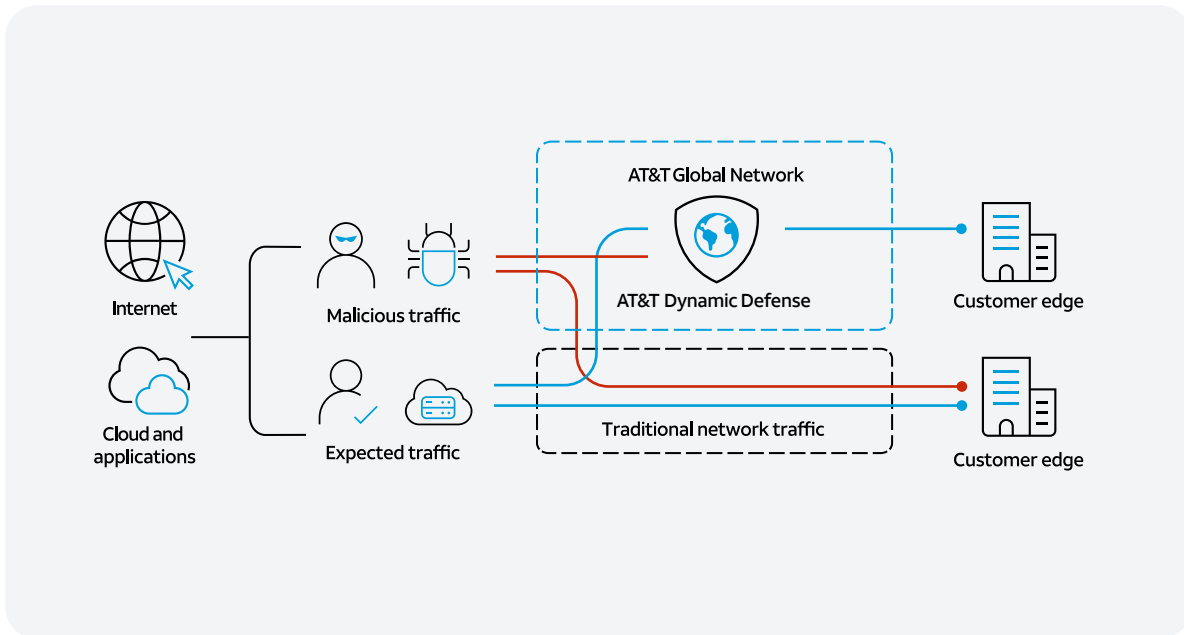

Get AT&T Dynamic Defense with AT&T Business Fiber, your first line of defense against cyber threats. It embeds security into your fiber connectivity to help detect and block malicious traffic at the network's edge—before it reaches your business. This proactive approach keeps your network data and operations safe while maintaining high performance.

Simplified security

AT&T Dynamic Defense combines multiple security features into a single, integrated solution. It eliminates the need for extra hardware and streamlines your security infrastructure. Dynamic Defense adapts to your needs and delivers enterprise-grade protection without complexity.

Optimized performance

With AT&T Dynamic Defense on AT&T Business Fiber, you get uploads and downloads at the same speeds, ranging from 300 Mbps to 5 Gbps.* By blocking threats before they reach your network, Dynamic Defense preserves your bandwidth while fiber delivers a faster, more reliable experience for both employees and customers.

Effortless integration

AT&T Dynamic Defense and AT&T Business Fiber deploys easily and complements your existing network and IT workflows. Its user-friendly dashboard provides real-time insights into threat protection and network performance, helping you make informed decisions.

Unrivaled threat protection

The AT&T global network processes more than 900 petabytes on an average business day, providing unique insight into emerging threats. Dynamic Defense continuously adapts to a changing risk landscape.

With AT&T Dynamic Defense you can:

- Customize security policies to filter traffic by geographic location, web address, or to manage application access
- Use comprehensive reports and logs to analyze network traffic
- Use version control to quickly restore security settings
- Block malware and unauthorized access to preserve bandwidth
- Comply with regulatory requirements

Secure connectivity for a modern network

With AT&T Dynamic Defense and AT&T Business Fiber, you gain fast, secure, and reliable high-performance connectivity—a network that helps your business grow, adapt, and stay ahead as your needs change.
