

# Optimize your cloud journey using hybrid networks

## Potential benefits

### Industry-leading capabilities

Build your competitive advantage using integrated solutions from AT&T, the world's largest communications company and Equinix, the world's largest global platform of interconnected data centers.

### Improved performance

Globally distributed infrastructure close to dense concentrations of ecosystems, cloud service providers, customers, and users can help lower latency and improve application performance.

### Accelerated deployment

Rapid access to the AT&T network from most of the Equinix IBX data centers with direct connections to AT&T WAN services and pre-built AT&T Ethernet.

### Streamlined contracting

Use your AT&T Master Service Agreement to help streamline the Equinix contracting process.

### Increased flexibility

Ability to change the geographic location of computing resources more quickly and cost-effectively, while scaling up and down, as needed.

### Cost savings

Help reduce costs and get results by leveraging interconnection at digital edge.

## Accelerate your digital transformation using the cloud

Gartner® states that by 2025, 85% of infrastructure strategies will integrate on-premises, colocation, cloud, and edge delivery options, compared with 20% in 2020<sup>1</sup>. These hybrid-cloud architectures use wide area network (WAN) technologies to bring together applications and data across clouds, on-premises, and colocation data centers.

AT&T Business with Equinix provides a suite of networking capabilities and interconnectivity options that allow businesses to connect to hybrid and multi-cloud environments, as well as to global customer, partner, and service provider ecosystems.

## Position yourself for future success

AT&T Business has established direct on-net networking in many of the Equinix International Business Exchange™ (IBX®) data centers around the globe. This collaboration has grown increasingly valuable for organizations that need integrated network solutions to help:

- Reduce latency
- Increase flexibility
- Improve overall performance

Our integrated offerings enable you to reduce the complexity and expense of owned data center facilities, while enabling you to build a resilient and flexible infrastructure that can more easily adapt to changing business needs.

## Access the vast AT&T network through most of the Equinix IBX data center across the globe

Platform Equinix® is the world's largest global platform of interconnected data centers and business ecosystems, supporting companies and industries in markets across the globe. On Platform Equinix, businesses can adopt a network right-sizing strategy that focuses on launching the right connection for each business-location needed, then matching application requirements and usage to the right AT&T networking technology.

This collaboration offers direct access to prebuilt AT&T Ethernet, including AT&T Switched Ethernet (ASE), AT&T Switched Ethernet On-Demand (ASE On-Demand), and AT&T Dedicated Ethernet with speeds up to 100G, plus all AT&T WAN services including EPLS-WAN, AT&T Virtual Private Network (AVPN), and AT&T Dedicated Internet (ADI).

Companies looking for high-performance, private, physical connections have choices. These include running cross connects to parties within the same Equinix IBX data center or campus, and metro connects within a metro area. Customers can also deploy at one IBX data center to a partner, customer, or themselves at a different IBX in the same metro.

Companies that require global, software-defined interconnection have the option of [AT&T NetBond® for Cloud](#), which supports direct connections to a number of leading cloud providers, and [Equinix Fabric™](#), which offers the highest number of native cloud and service provider on-ramps and is available in more than 50 markets worldwide. AT&T NetBond for Cloud is also natively connected to Equinix Fabric, which provides a rapidly deployable bridge to AT&T Business solutions inside of Platform Equinix.

AT&T Business with Equinix provides you access to:

**225+**  
Data centers

**65**  
Metros

**2,900+**  
Cloud & IT services

**>99.999%\***  
Uptime record

\* As measured from January 1–December 31, 2020, for IBX Operations.
