

AT&T Business Mobility

Leading the competition

Connectivity where and when you need it.

Business mobility was born at AT&T. We created the first mobile phone service at Bell Labs more than 75 years ago, and we've been redefining what's possible ever since.¹ With close to 2.5 million of the largest global companies, small businesses, government agencies, and nearly all Fortune 1000 companies as our customers², we're helping enterprises reach their fullest potential.

AT&T has the largest wireless network in North America,³ covering more than 2.99 million square miles and reaching more than 99% of the U.S. population.⁴

The AT&T difference

We are the converged network leader. With more than 1.4 million miles of fiber globally and a 5G network⁵ that covers over 320 million people nationwide, we deliver dependable, resilient connectivity on a network built for business.

- GlobalData has named us a Leader in Enterprise Mobility Services three years in a row (2023-2025).
- Our acquisition of mid-band and low-band spectrum from Echostar will expand our leading convergence of 5G and business internet—via fiber or fixed wireless—to more than 400 markets across the U.S.⁶
- Since its inception, we've invested more than \$1 billion in our disaster recovery program making it one of the largest and most advanced in the industry, enabling swift response and rapid restoration of communications during emergencies.
- We have a team of meteorologists delivering business-specific weather intelligence, analytics, and forecasts to mitigate our risk of impact to our network and assets.
- We own more than 1,000 security-related patents. We use the latest threat detection and security tools to secure your network like we secure our own.

⁵ Requires compatible plan and device. Coverage is not available everywhere. Learn more at att.com/5Gforyou.

How our products and services set us apart.

- We are the **first carrier** to offer an integrated fiber and wireless gateway.
- We are the **only carrier** to prioritize eligible business data during times of network congestion.⁷
- We are the **only carrier** to offer a High Power User Equipment (HPUE) solution that significantly improves signal strength and coverage in dense urban, rural, and remote locations.⁸
- We are the **only carrier** to offer an independent, dedicated core built to support public safety professionals. The dedicated FirstNet network core separates public safety from commercial traffic.
- We are the **only carrier** without limits on data usage when traveling to Mexico and Canada.⁹
- Our AT&T Device Management Program offers direct, out-of-the-box security and configuration for **fast and easy** device enrollment and setup.
- We offer a device protection solution **designed and priced specifically** for enterprises.

Connecting people and businesses. It's in our DNA.

For nearly 150 years, we've been connecting and growing businesses around the world. Our success goes beyond being the best connectivity provider. We're also a team of technology and business experts focused on bringing people and businesses together, no matter how close or far apart they might be.

Our fiber and 5G networks are built with a multi-decade lifespan to support your future-ready connectivity. We continue to expand our capabilities, maintaining seamless, reliable connections for our customers with solutions like automatic wireless failover via a single, integrated gateway—a carrier first.

As we enter a new era defined by wireless and fiber integration, we're committed to delivering network service and performance you can count on across every node, every switch, every access point. Our expertise, knowledge, and resources make us the provider of choice for secure, reliable, high-speed connectivity—wherever business leads you. When combined with our unique blend of innovation, leadership, and business expertise, we've set a new benchmark in delivering future-ready, enterprise-grade mobility.

Why AT&T Business?

See how ultra-fast, reliable fiber and 5G connectivity, protected by built-in security, give you a new level of confidence in the possibilities of your network. Let our experts work with you to solve your challenges and accelerate outcomes. Your business deserves the AT&T Business difference—a new standard for networking.
