Let AT&T help you build a scalable, flexible, and versatile collaboration platform that includes telephony, videoconferencing, collaboration, and workflow-management tools.

Designed to meet the needs of your connected business, Webex with AT&T is a comprehensive and industry-leading communication and collaboration platform. Consisting of three solutions — Cisco Webex Meetings with AT&T, Cisco Webex Calling with AT&T, and Cisco Webex Teams with AT&T — the platform provides centralized, always-on collaboration that includes video and telephony, collaboration tools, and easy-to-use functions for online meetings and sharing content.

Webex with AT&T is a straightforward and scalable license solution, based on monthly per-user fees. Customers who use Webex with AT&T can access the latest collaboration functions with minimal capital investment, simplified contracting, and predictable pricing.

AT&T can align an adoption plan with your organizations’ cloud and Unified Communications (UC) transformation roadmap, so you can benefit from increased continuity and disaster recovery with total cost of ownership (TCO), technology risk, and vendor complexity.

A comprehensive collaboration platform

Webex with AT&T is designed to make workstream collaboration easier, more cost effective, and more closely integrated with key systems and processes. The platform consists of three solutions:

- **Webex Calling with AT&T:** A communications solution providing voice calling, instant messaging, chat, email, voicemail, video conferencing, Public Switched Telephone Network (PSTN) dialing, and much more.
- **Webex Meetings with AT&T:** A collaboration suite that includes desktop sharing, webinar, and presentation functions, it integrates well with leading third-party software.
- **Webex Teams with AT&T:** This workflow-management solution connects team members in a highly secure, shared workspace for co-creation and content sharing.

A flexible portfolio that evolves at your pace

Many businesses are moving away from legacy PBX-based solutions and on-premises communications architecture. As they do, they must be mindful of existing infrastructures and contracts — and how best to maximize their ROI.

Simultaneously, many organizations are adopting multiple collaboration technologies to improve teamwork across functions and sites. AT&T can consolidate both agendas with a personalized UC transformation roadmap that integrates a range of on-site and cloud unified communications solutions. This lets you migrate functions from on-premises through hybrid and to the cloud at your own pace.
Webex Calling with AT&T

Webex Calling with AT&T incorporates a range of communication and collaboration features in a single client with a consistent user experience. This solution provides standard telephony features you’d expect including voicemail, call groups, shared lines, and call forwarding. It also supports other communication channels such as instant messaging and video conferencing.

Webex Calling with AT&T integrates with on-premises Cisco IP telephony infrastructure, protecting your existing investments. This provides your enterprise new features and capabilities offered by a Webex with AT&T cloud solution, while making it easy to continue maximizing the value in your current on-premises equipment. Solution features include:

- Robust and reliable IP telephony
- A virtual receptionist to greet callers
- Simple, straightforward user portal
- Personalized voicemail
- Seamless IP-to-PSTN calling
- Unified messaging
- Easy-to-manage contact lists
- IM, chat, and presence

Webex Meetings with AT&T

When you choose Webex Meetings with AT&T, you get a feature-rich solution that can host meetings and webinars for up to 40,000 participants. Webex Meetings with AT&T works with your existing calendar application, allowing for easy scheduling. Users can present and share from virtually any device, mobile or desktop, and record a meeting at the click of a button.

AT&T supports the integration of immersive and pervasive video platforms, in addition to a range of new, intelligent devices for maximum creative freedom. Additionally, AT&T is compatible with complementary enterprise platforms. Solution features include:

- Full-screen video conferencing
- Anyone can host a meeting
- Up to 7 video feeds and split-screen mode
- Easy audio and presentation sharing
- Works on PC, tablet and mobile
- Record meetings (including video)
- Advanced collaboration tools
- 75 video-participants in one meeting

The solution can be augmented with AT&T Netbond® for Cloud, to provide greater assurance and quality of service (QoS) for organizations with more complex requirements or regulatory demands.
Webex with AT&T

AT&T collaboration expertise
AT&T can help you integrate the Webex platform with UC technologies from other vendors, including Google and Microsoft. With a global footprint in over 100 countries, we’re there to support you wherever you do business.

Our expert consultants can help you envision and strategize a UC transformation roadmap. Through a track record in delivering world-class network and communications solutions, AT&T can help take your voice, UC and video technologies towards integrated and automated business processes.

Webex with AT&T uses an active-user licensing model, which makes it both highly cost-effective and easily scalable. You only pay for what you need, so transparency and consistency of pricing simplifies financial and resource planning.

This solution has a single, straightforward contract and standardized billing, so costs are predictable and easy to manage. The platform is constantly updated with new features and functions, so companies no longer need to factor in the periodic expenses and disruption caused by system-wide upgrades.

Webex with AT&T is your gateway to new standards in team collaboration, innovation, and transformation.

Webex Teams with AT&T
An industry-leading workflow management solution, Cisco Webex Teams with AT&T provides a shared meeting space for every project. Users can find documents, contacts, relevant content, and records of all the communications related to that project, all in one centralized workspace. Webex Teams with AT&T also incorporates powerful search tools to help colleagues find information faster. Solution features include:

- A workspace for every project
- Group messaging for instant feedback
- Always on so you never miss an update
- Easy content management
- Powerful built-in search
- Share files easily
- Built-in scheduling
- Simple third-party integration

Webex Teams with AT&T is compatible with both Webex Calling with AT&T and Webex Meetings with AT&T, but can be extended further with APIs into IoT, enterprise applications, and contact center platforms.
Simple, expert migration planning

Migrating to Webex Calling with AT&T doesn’t need to be costly or disruptive. With our adoption plan, Acquire & Grow with AT&T, you get the communications and collaboration features you need today — and have confidence that you can migrate further functions to the cloud easily and in a controlled manner whenever you need. Through Acquire & Grow with AT&T, the legacy investment and financial planning barriers inhibiting migration to contemporary solutions have been removed.
