

AT&T Managed Wireless WAN provides quick, flexible connectivity

Untether locations, assets, and people with a plug-and-play solution that's managed and monitored by AT&T network experts

Perhaps you're traveling to a trade show and you want to bring your own portable network. Maybe you need a temporary internet connection for your branch site, pop-up store, or construction trailer. Or maybe you need a backup internet connection for when your primary connection is lost.

All of these challenges can be solved with AT&T Managed Wireless WAN. This plug-and-play solution is enabled through our relationship with Cradlepoint. AT&T Business supplies you with Cradlepoint hardware that we monitor on your behalf. The equipment and licensing are managed by AT&T Business, letting you avoid upfront hardware and licensing purchases.

Features

- Fully managed wireless networking solution when bundled with select AT&T and/or 3rd Party rate plans
- Connect branch offices, temporary sites, and remote employees
- Enabled through our relationship with Cradlepoint, a market leader in wireless WAN technology

Benefits

- Get quick internet connectivity where wired connections are unavailable, costly to deploy, or require long lead times
- Replace large upfront hardware and licensing purchases with a fixed monthly fee
- Network Visibility: easy access to cloud-based tools providing reporting and analytics.
- Expand your business to new locations

How we'll manage solution

- Provide 24/7 support with proactive monitoring and remote troubleshooting
- Automatically connect, license, and configure the device
- Monitor solution signal strength, reliability, and health
- Diagnose and solve actionable alerts
- Perform software upgrades
- Provide a single point of contact for support

AT&T Managed Wireless WAN lets you untether locations, assets, and people and modernize your network. This versatile solution can help you in a wide variety of situations:

- You have SD-WAN and need a secure, reliable, and fast primary or secondary link
- You have fixed-location sites and don't have access to wired connections
- You have fixed-location sites and would like to replace your wired connection
- You need temporary internet connections at your branch site, pop-up store, or construction trailer
- You're expanding to a new location and can't wait months for cable to be installed

AT&T Managed Wireless WAN can connect anywhere from 10 to thousands of endpoints. It provides high quality voice and video across any combination of

transport service. It also gives you access to the cloud, data center applications, and the internet from virtually anywhere.

Cradlepoint branch adapters are 5G enabled but will also work on 4G networks. Because AT&T 5G provides fast download speeds, lower latency, and more capacity and connectivity for millions of devices, business use cases are virtually endless. Retailers can use 5G to create augmented reality and virtual reality shopping experiences. Manufacturers can use 5G to optimize production workflows through near-immediate data analysis. Healthcare providers can benefit from real-time transfers of large diagnostic image files. The entertainment industry can use augmented and virtual reality for better fan experiences.

The AT&T 5G network is available nationwide and serves 255 million customers in 14,000 cities and towns across the U.S. AT&T also has the most reliable 5G network.¹

Why AT&T

AT&T provides flexible connectivity using the latest 5G technology devices – whether it be for a primary or secondary link – delivering a consistent and reliable network experience that's fully managed.
