Gone are the days of paper logs and making daily calls to check in with drivers. Now, managers and employees can download and use AT&T Workforce Manager, which makes it easier to collect and review driver logs, gauge individual performance, and optimize an entirely remote workforce, all from a smartphone application. Cost-effective and cloud-based, AT&T Workforce Manager is the only application needed to manage remote employees, vehicles and assets. In addition to being easy to use, it’s easy to setup. For managers and employees, the application can be configured in as few as 10 minutes by using the intuitive startup wizard. Say goodbye to the inefficient ways of the past by switching to AT&T Workforce Manager.

With recent advancements in cloud-based applications, remote workforce management has become easier than ever with the help of AT&T Workforce Manager. Now, you can get virtually instant insights into your remote employees’ performance via a single application.

How AT&T Workforce Manager makes remote employees accountable in virtually any industry

Healthcare
• Send digital forms from remote locations, improving the speed of service
• Locate vehicles in near-real time to alert customers of estimated time of arrival
• Reduce theft of mobile assets and increase chance of device recovery
• Enable in-home care workforce to clock in and out via mobile device

Manufacturing
• View employee time clock status in near-real time, including breaks and lunches
• Review individual timesheets and reports to help manage overtime cost
• Collect proof of delivery with GPS location stamp and digital signatures on bill of lading forms
• Use prebuilt industry-specific forms or customize your own for safety checks and inspections

Energy (Oil/Gas/Utility)
• Schedule routine maintenance, helping to prolong the life of the vehicles in your fleet
• Fill out digital forms from job sites for proper invoicing and billing
• Increase accountability and safety of mobile employees working in hazardous conditions
• Use AT&T Enhanced Push-to-Talk and GPS to help improve safety and communication

Construction
• Enable mobile timekeeping from anywhere
• Keep track of crew members’ locations, length of time on site, and job duration
• Collect and push field data for manager review
• Help ensure strict adherence to OSHA forms with signature, image, and GPS location

Why AT&T
AT&T can help you identify and implement the digital technologies you need—from one edge of your business to the other—to help manage your remote workforce and improve productivity. We offer the expert consulting and support services you need to transform your business.
