Wireless data designed with your business essential applications and budget in mind.

AT&T Wireless Broadband can give your company’s business connectivity the boost it needs to handle today’s business data needs:

• Get the additional bandwidth you need to run your most important business programs, including point-of-sale, electronic time clocks and cloud-based applications. AT&T Wireless Broadband is not intended as a substitute for consumer internet services.

• Get connectivity for business apps up and running fast when wireline options aren’t available.

• Create a diverse, flexible, and manageable business network connection using cellular. 50Mbps and higher plans are now available for use with a 5G and/or 5G+ device - you’ll get access to AT&T 5G low band spectrum (5G) and/or AT&T 5G mmWave (5G+) services, where each is available.

• Prioritize business-critical applications on the AT&T domestic 4G LTE network with AT&T Business Fast Track. Wireless isn’t just for smartphones anymore, it’s evolved to help enterprises increase their network efficiency, agility, and control at nearly every level. Whether it’s used as the primary or failover service, AT&T Wireless Broadband can provide a cost-effective network alternative for business-critical applications, a diverse backup option for business data applications, and a quick deployment option for new and remote business locations, including work from home.

Wireless broadband from AT&T can also help keep your bottom line in check. Our plans are based on connection speed, not on the amount of data you use, so there are no overage charges. Whether you need a lower speed to support a few business-critical applications or top speed to support all your business-critical data, your bill is predictable from month to month.

AT&T Wireless Broadband

1 Limited availability: may not be avail. in your area. See att.com/5Gforyou for details. 5G service: Req’s 5G compatible device and plan. 5G+ service: Req’s 5G+ compatible device and plan. Avail. only in very limited parts of specific cities. Other restr’s apply.

2 Feature does not provide priority network access or prioritize eligible data traffic ahead of all other data traffic, as other data traffic may receive a similar or higher priority level. Not avail. on 5G or 5G+ network. Other restr’s apply.
Choose how you use your AT&T Wireless Broadband:

Primary connection. AT&T Wireless Broadband provides a cost-effective, rapidly deployable connection to your branch or remote offices where lack of service or special construction costs limit your options.

New technologies. Using wireless broadband as a dedicated connection for new applications enables your business to adopt new technologies that can help you innovate without adding unnecessary congestion to your wireline network.

Network augmentation. Establish an active-active network with business essential applications like timekeeping and point of sale riding the AT&T wireless network, and high-usage applications like public Wi-Fi and streaming services riding a wireline connection.

“Always-on” failover. Why would you pay for a backup network connection and then not use it regularly? AT&T Wireless Broadband offers a highly reliable and diverse internet option that can serve your day-to-day data needs and function as a primary connection in the event your secondary connection fails. In the event of a wireline outage, you can switch your connections to your AT&T Wireless Broadband.

To learn more about how AT&T Wireless Broadband can work for your business, visit att.com/AWB

Potential benefits

- Fast, highly reliable connections for business-critical applications
- Predictable monthly charges
- Network availability in the event of congestion

Features

- Select from four speed tiers with unlimited data and no overage charges while on AT&T owned and operated networks
- 50Mbps and higher plans are now available for use with a 5G and/or 5G+ device - you'll get access to AT&T 5G low band spectrum (5G) and/or AT&T 5G mmWave (5G+) services, where each is available
- Prioritize business-critical applications with AT&T Business FastTrack
- Efficiently and effectively connect new sites

**Taxes & fees extra**

¹ Data throughput speeds are capped and subject to network availability and not guaranteed.
² Plans are not intended as a substitute for consumer internet services. Accordingly, plans do not allow access to entertainment and other non-business websites that offer video or audio streaming entertainment services & may not be used for web hosting or public or guest Wi-Fi.
³ 8Mbps and 12Mbps plans may not be used with 5G and/or 5G+ routers.
⁴ Data throughput speed requires a wireless router with a Category 18 or higher modem and use where enhanced AT&T 4G LTE-Advanced service or 5G/5G+ service are available.

See page 4 for plan terms
AT&T WIRELESS BROADBAND PLANS: Prices are for service only. Eligibility: Available only to business and government customers with a qualified AT&T wireless service agreement, including without limitation the Additional Service and Equipment-Related Terms found at att.com/abs-addit-terms (Business Agreement). For their Corporate Responsibility User (CRU) lines of service only. Eligible Devices: Plans may only be used for a CRU line with a qualified data-only wireless router (sold separately) using machine-to-machine business applications needing wireless data communication between the router and Customer’s business data network. Installment plan charges and other device purchase costs are extra. 5G/5G+ capable devices may only be used with 50Mbps or higher plans. Device Requirements: Each qualified device activated with an AT&T Wireless Broadband plan must be located in a fixed location within AT&T’s owned and operated 4G LTE wireless network coverage area within the U.S. (Domestic Coverage Area or DCA). Plans do not include international roaming. 5G+ NETWORK ACCESS & COVERAGE: 50Mbps and higher AT&T Wireless Broadband – Business plans for 5G/5G+ devices include access to AT&T 5G millimeter wave (5G+) service. Requires 5G+ capable device. 5G+ service is not available in most areas; it is available only in very limited parts of specific cities. See att.com/5Gforyou for details. 5G+ service is available outdoors within line-of-sight of cell site only. Other restrictions apply. 5G NETWORK ACCESS & COVERAGE: 50Mbps and higher AT&T Wireless Broadband – Business plans for 5G/5G+ devices include access to AT&T 5G low band spectrum (5G) service. Requires 5G capable device. 5G service is not available everywhere. See att.com/5Gforyou for details. DATA SPEEDS: Each plan has a maximum data speed of 8 Mbps, 12 Mbps, 50 Mbps or 100 Mbps, depending on the selected plan. 50 Mbps and 100 Mbps maximum data speeds are not available in all coverage areas and require a device capable of using enhanced AT&T 4G LTE-Advanced technologies or 5G/5G+ service. DATA RESTRICTIONS: After data usage on a line reaches usage thresholds for its particular AT&T Wireless Broadband plan in a bill cycle, for the remainder of the cycle AT&T may temporarily slow data speeds on that line during times of network congestion. The plan usage thresholds are 175GB for the 100Mbps plan, 125GB for the 50Mbps plan, 75 GB for the 12Mbps plan and 50 GB for the 8Mbps plan. See att.com/broadbandinfo for details about AT&T network management policies. SERVICE RESTRICTIONS: AT&T Wireless Broadband does not permit access to all internet endpoints or services. Plans are limited to use with business applications, including business video applications. Plans may not be used for entertainment video streaming, surveillance video streaming, audio streaming, web hosting, public/guest Wi-Fi, and other prohibited uses set forth in the Business Agreement. AT&T BUSINESS FAST TRACK SOLUTION Plan includes a) "always-on" business fast track feature, which prioritizes all business application data originating on and traveling over the 4G LTE network or b) Custom IP Packet-Marking for customers with AT&T Private Mobile Connection services, which enables the Customer to mark its data packets for wireless to wireline and wireline to wireless class of service mapping across the AT&T 4G LTE network. For Customer IP Packet Marking, an AT&T Mobility Technical Engineer will help the Customer decide which QoS is best suited for particular business applications and implement and integrate it with a) AT&T Private Mobile Connection services. Both features provide Critical Data quality of service (“QoS”) network technology to give a Customer a differentiated (i.e., enhanced versus "best efforts") network experience for Business Application/ data traffic originated on and traversing entirely over the AT&T-owned domestic 4G LTE network (excludes microcells, AT&T Wi-Fi service, roaming partner networks, and AT&T 5G and 5G+ networks). The feature does not include priority access to available AT&T network resources or preemption Device Requirements: Each line must have a AT&T Wireless Broadband plan and an applicable compatible device. Usage Limitation: Each line may use Business Fast Track up to 5GB of data with the 100Mbps plan, 3GB of data with the 50Mbps plan and 1GB of data with the 12Mbps plan and 8Mbps plans. See att.com/broadbandinfo for details about AT&T network management policies. SERVICE RESTRICTIONS: AT&T Wireless Broadband does not permit access to all internet endpoints or services. Plans are limited to use with business applications, including business video applications. Plans may not be used for entertainment video streaming, surveillance video streaming, audio streaming, web hosting, public/guest Wi-Fi, and other prohibited uses set forth in the Business Agreement. GENERAL ON-DEMAND VOICE SERVICE TERMS: Subject to applicable Business Agreement. SERVICE is not for resale & is intended for use w/in DCA. AT&T does not enforce any of the terms or restrictions of its service offerings; it is not a waiver of AT&T’s right to enforce those terms or restrictions. AT&T reserves the right to enforce all terms & restrictions at any time. If AT&T determines your use of services violates any of the applicable terms or policies found in the Business Agreement, we may in our sole discretion suspend, modify, terminate or restrict your service. COVERAGE: Coverage map shown on wireless.att.com/coverageviewer. Coverage may include areas that are served by unaffiliated carriers & not on an AT&T owned and operated network (off-net). Coverage is subject to change without notice. See att.com/broadbandinfo for details. OFF-NET USAGE: Domestic off-net (roaming) data usage may be at 5G speeds. Excessive Off-Net Usage: You get an off-net (roaming) usage allowance for each service. If you exceed the allowance, your service(s) may be restricted or terminated. OTHER RESTRICTIONS & FEES: Other restrictions apply & may result in service termination. If you purchased a device that requires a term commitment, an Early Termination/Cancellation Fee applies if you cancel service after the first 30 days & before your term ends. See att.com/esimendTL for details on what fee may apply for your device and how the fee is prorated over time. Activation/upgrade fee per line (up to $45) & deposit may apply. Credit approval may be required. AT&T reserves the right to suspend or terminate service on your account, place any noncomplying device on an appropriate plan, and/or add any other required element of a plan. ADDITIONAL MONTHLY FEES & TAXES: Apply per line & include Regulatory Cost Recovery Charge (up to $150), Administrative Fee ($199), & other fees which are not government-required surcharges (including without limitation a Property Tax Abatement surcharge of $0.00 - $455 applied per CRU’s assigned number) as well as taxes. Additional one-time charges may apply. See att.com/mobilefees for more details. For full service terms and conditions, see the Business Agreement.
