- Work more efficiently and productively
- Save time and money
- Add new sites and phone numbers easily
- No new hardware needed

## Drive collaboration and be more productive with business-grade voice from AT&T Business.

Chances are the tools you use to communicate and collaborate internally today look quite different compared to just a few years ago. Switching between meetings, calls, and chats needs to be effortless. Remote and hybrid working is now the norm. You need to reach people wherever they are. With collaboration tools at their fingertips, your workforce is engaged and productive.

Now with AT&T Cloud Voice with Microsoft Teams, you can call outside your organization to your customers, vendors, and partners as easily as you connect internally.

AT&T Cloud Voice with Microsoft Teams takes the complexity out of your evolution to the cloud with solutions that enable your Microsoft Teams users to easily make and receive highly reliable, business-grade voice calls inside and outside your organization. It brings together the quality and reliability of the AT&T voice network with your on-premises and cloud application platforms.

### Flexibility for any environment

When you migrate to our cloud-based solutions, you have options. Choose our express solution and leave your on-premises equipment and administration behind. Or, if you want to integrate existing hardware, choose our enhanced solution, and we'll ensure a smooth and seamless transition. No matter how simple or complex your environment, you'll get reliable, business-grade voice services.

## How it works

AT&T Cloud Voice with Microsoft Teams provides a cloud-based-managed session border controller (SBC) and delivers voice and data traffic over a single IP platform. This helps manage and protect real-time communications voice, video, text chat, and collaboration sessions. Your team can connect and collaborate in multiple, highly-secure ways through the Microsoft Teams environment.

## Drive collaboration, be more productive

Wherever you are in your cloud journey, we'll meet you there with our cloud voice solutions that are right for you now and into your future. Whether your environment is simple, complex, or somewhere in between, AT&T Cloud Voice with Microsoft Teams makes collaboration with employees, partners, and customers simpler and better. And we make managing your voice solutions fast and easy.

### Collaboration for a modern business

Enable your Microsoft Teams users to easily make and receive highly reliable, business-grade voice calls. We integrate session internet protocol (SIP) trunking with cloud solutions to deliver a voice connection you can count on.

#### AT&T Network

Get business-grade voice over our highly secure, resilient, fully managed network.

#### Emergency calling

Included with our cloud voice connectivity solutions.

#### Round-the-clock support

We're here whenever you need us with 24/7 technical support.

#### Two complementary solutions

AT&T Cloud Voice with Microsoft Teams simplifies your transition to the cloud.

We'll help you choose the option that's right for your business: express or enhanced.

#### Manage phone numbers

Easily add new sites and telephone numbers using your web-based customer portal.

#### Flexible calling plans

Multiple bundling options are available to meet your voice needs.

#### Call anywhere

Make calling quick and easy inside and outside your organization.

#### Accelerate cloud adoption

Flexibility to integrate your existing on-premises equipment with cloud features. No new hardware investment required.

## Accelerate your cloud voice journey

**Talk to a business expert today.**  
**833.443.0783**

When it comes to voice and network connectivity, no two businesses or environments are alike. Should you migrate your voice solution completely to the cloud or take a hybrid approach and integrate your on-premises equipment? It can be difficult to know what the best option is for your business.

No matter where you are in your network transformation journey, AT&T Consulting and Professional Services can help. Voice and network connectivity are in our DNA. We have deep experience with Microsoft Teams migrations across industries. We can help accelerate your voice services evolution while reducing risks. From analyzing your environment, to focusing your strategy, through implementation, we're here for you.

## Why AT&T Business?

The key to realizing seamless cloud transformation is having the right connectivity. Whether you're migrating to the cloud or evolving to multi-cloud, connect with confidence. Let our experts work with you to solve your cloud connectivity challenges and accelerate outcomes. Your business deserves the AT&T Business difference—a new standard for networking.
