

AT&T Dedicated Internet

Fast speeds. More availability. 100% uptime guaranteed – or we'll credit your account.

Benefits

- Your internet connection is dedicated, not shared with other businesses.
- You'll get the fastest speed, up to 1Tbps, to support critical business applications.¹
- You can count on our reliability, backed by world-class service level agreements providing a 100% uptime guarantee – or we'll credit your account.
- We'll secure your network with the first and only embedded network security solution.
- You're always in control with a personalized online portal, built-in proactive monitoring, and wireless backup, assuring continuous end-to-end availability.

Experience first-class business internet service.

When it comes to internet speed and performance, sharing is not caring. For example, if you're using cable broadband for your business, did you know that you're sharing your bandwidth with other businesses? Nearby businesses share the same internet connection; therefore, your own speeds may fluctuate based on overall customer usage.

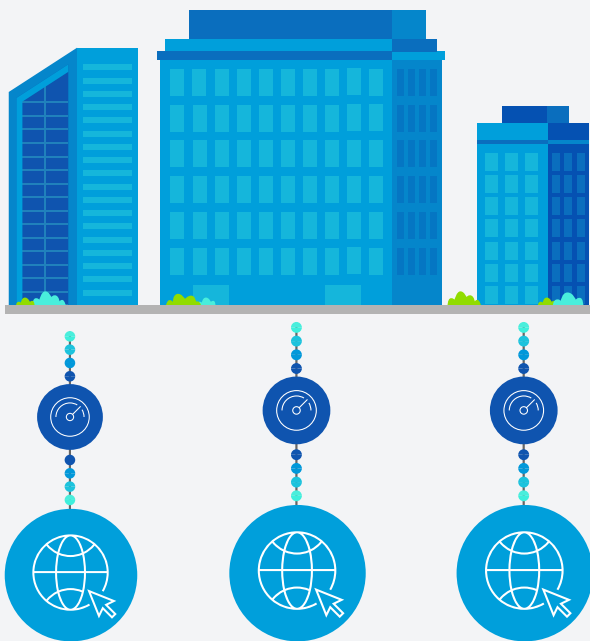

What you want is guaranteed speed and performance, whether you're connecting one site or many. You shouldn't need to worry about how much bandwidth nearby businesses are siphoning away from you.

What you want is AT&T Dedicated Internet – where all the bandwidth is just for you.

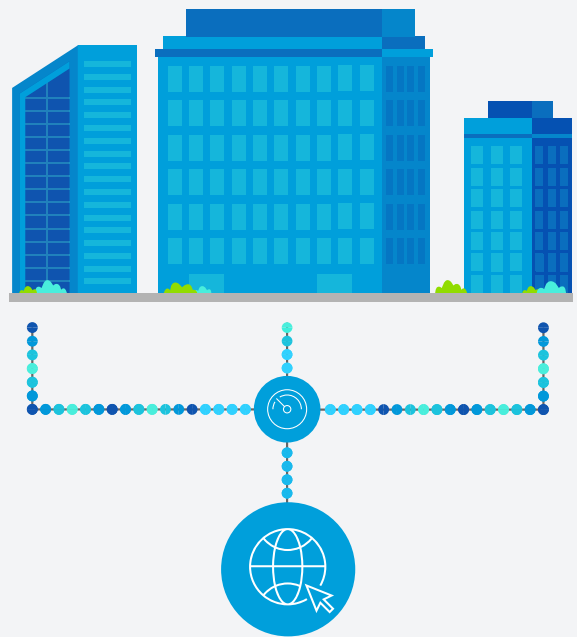

¹ Speed claims are actual guaranteed speeds of 500 Mbps to 1Tbps. Fastest based on comparable dedicated internet speeds

Get dedicated bandwidth with guaranteed speeds

Dedicated internet connection

Shared internet connection

We dedicate this internet to you.

With AT&T Dedicated Internet, you get your own dedicated bandwidth. It's all yours.

And the performance is off the charts.

We offer more service commitments than any other company. We guarantee that your service will have:

- 100% uptime guaranteed—or we'll credit your account
- 37 milliseconds or fewer of latency
- 1 millisecond or fewer of jitter
- 99.95% data delivery

You'll also get symmetrical upload and download speeds. That means your data travels at the same fast speed, going out of your network and coming in. That's crucial for applications that simultaneously send and receive large amounts of data, like video conferencing and broadcasting.

Unrivaled threat protection with AT&T Dynamic Defense.

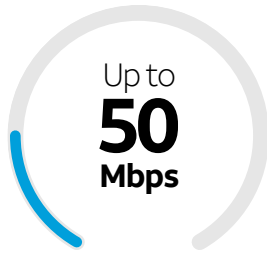

We secure your dedicated internet with innovative security tools to detect and prevent cyber threats. An embedded network security solution that extends from AT&T to your local area network (LAN). It uses machine learning (ML) and artificial intelligence (AI) to adapt to the evolving risk landscape.

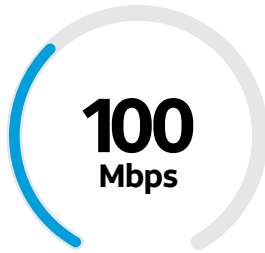

**Your internet is not really yours unless
you have AT&T Dedicated Internet**

Choose the speed you need

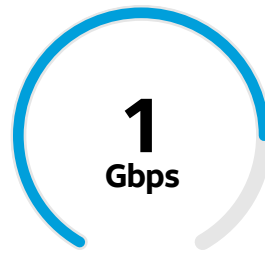

Choose your speed – but make changes any time as needed. You can adjust all your locations together or individually as your business grows.

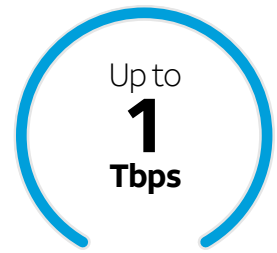

Ideal for light web browsing, occasional file downloads, quality streaming music, and smooth Voice over Internet Protocol (VoIP) conversations

Ideal for large file downloads and uploads, multiple users, effective video conferencing, and conversational VoIP experiences

Ideal for heavy online usage, collaborative video conferencing, continuous streaming, engaging media file sharing, and seamless access to cloud applications

Ideal for hassle-free e-commerce hosting, high performing cloud apps, real-time large file transfers, ultra-high-definition video, and large group web conferencing

Prioritize your traffic. Within the speed you choose, you can prioritize the class of service that's important to you. For example, if you rely heavily on video streaming or conduct e-commerce, you can prioritize those activities to get more of your bandwidth when it's needed.

Dependability that delivers more than connectivity. AT&T Dedicated Internet comes with cyber threat analysis and embedded network security at no charge, proactive monitoring, up to five static IP addresses, and automatic service tickets in the unlikely event of an outage. To get even more out of your dedicated internet,

you can add traffic prioritization and wireless backup as add-ons. You can also have service installed in as little as 10 days at one of our 3 million fiber-lit business locations.²

It's time. Stop sharing your internet bandwidth and dedicate it all to your business.

² **Quick installations (under 30 days)** We provide installation for: Fiber ready locations in as little as 10-20 business days. Non-Fiber ready 30 business days+.

Why AT&T Business?

See how ultra-fast, reliable fiber and 5G connectivity, protected by built-in security, give you a new level of confidence in the possibilities of your network. Let our experts work with you to solve your challenges and accelerate outcomes. Your business deserves the AT&T Business difference—a new standard for networking.
