Product Brief

AT&T Business

AT&T Dynamic Defense® on AT&T Internet Air® for Business

Built-in threat protection for secure, flexible wireless connectivity

Features and benefits

- **Help detect and block malicious traffic** before it reaches your business to help reduce risk and preserve productivity
- **Enhance security** for AT&T Internet Air for Business with network-level protection, without additional hardware to deploy or manage
- **Simplify security management** with a unified service that helps reduce operational burden
- **Monitor threats, network activity, and security policies** through a simple online portal
- **Deploy quickly** to qualified locations with AT&T Internet Air for Business self-installation
- **Scale protection** as your connectivity needs change across locations

Help stop threats before they reach your business

Built-in protection

AT&T Internet Air for Business provides flexible wireless connectivity at qualified locations. AT&T Dynamic Defense adds network-level protection to that connection, helping detect and block malicious traffic before it reaches your business. Together, they provide highly secure connectivity without adding additional security hardware or unnecessary complexity.

Fast and flexible deployment

AT&T Internet Air for Business is a fixed wireless internet solution designed for qualified service locations. It helps businesses connect new locations, remote sites, temporary operations, or network diversity use cases with simple self-installation. When paired with AT&T Dynamic Defense, it gives you flexible wireless connectivity with network-level protection that's easy to deploy and manage.

Simplified security control

AT&T Dynamic Defense brings multiple security capabilities into a unified service managed through a simple portal. You can monitor threats, review network activity, customize security policies, and access reporting to help maintain visibility and control.

Effortless integration

AT&T Dynamic Defense integrates easily with AT&T Internet Air for Business and complements your existing network and IT workflows. The solution helps organizations improve their security posture without requiring additional appliances or extensive configuration.

Threat intelligence at scale

The AT&T global network processes more than 1 exabyte of data on an average business day*, providing visibility into emerging threats. These insights help Dynamic Defense continuously adapt as the risk landscape evolves.

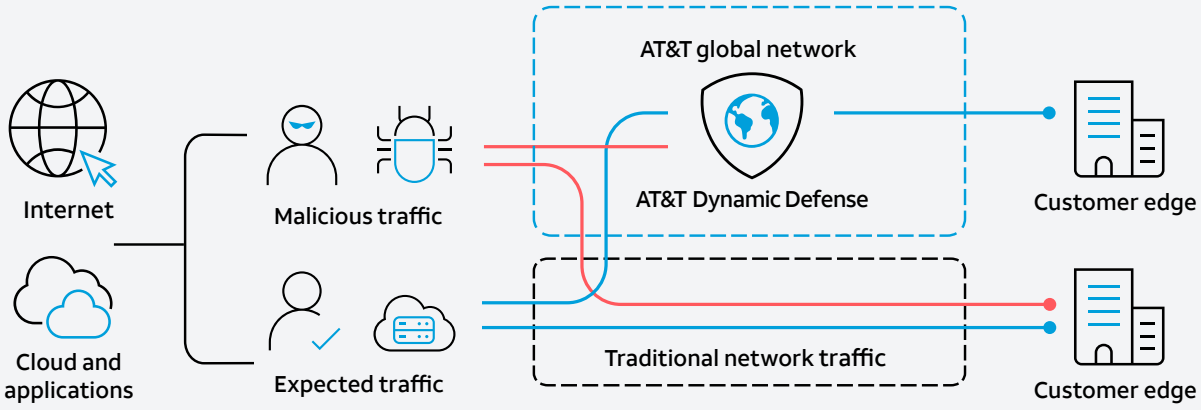

With AT&T Dynamic Defense you can:

- Customize security policies to filter traffic by geographic location, web address, or to manage application access
- Use the AI assistant for security insights, log analysis, and troubleshooting, plus AI defense to monitor and control AI usage across your network
- Analyze network traffic and support security decisions with comprehensive reports and logs

Secure connectivity for a modern network

Whether you need internet connectivity at a new location, a temporary site, a remote operation, or as part of a network diversity strategy, AT&T Internet Air for Business gives you flexible wireless connectivity at qualified locations. AT&T Dynamic Defense adds network-level protection to that connection, giving you a simpler way to support secure connectivity as your business grows and changes.
