The right data can increase your fleet’s efficiency, productivity, and level of compliance

Through the Internet of Things (IoT), AT&T Fleet Management for Enterprise enables you to optimize fleet routes, integrate compliance tools, minimize regulatory violations, and reduce fuel and maintenance costs.

As an enterprise, you face the constant, complex challenges of managing a fast-paced fleet for optimal efficiency and productivity—all while following strict protocols for regulatory compliance. AT&T Fleet Management for Enterprise provides virtual real-time data that helps you manage compliance, control costs, and optimize your fleet from one easy-to-use platform.

Productivity reports help you visualize fleet and driver activities.

Features
- One universal plug-and-play device for all vehicles
- Highly secure end-to-end data transfer
- Enhanced live-location tracking
- Web-based, interactive dashboards and customizable reports
- Performance, safety, and Hours of Service reporting
- Accident detection, notification, and reconstruction
- In-vehicle driver coaching

Potential Benefits
- Reduces costs for fuel, labor, and maintenance
- Addresses security and compliance requirements
- Helps maintain e-logs, HOS, DVIR, and IFTA mileage collection
- Increases employee and fleet productivity
- Reduces greenhouse gas emissions
- Decreases fraudulent fuel card expense using location, odometer reading, and MPG discrepancies
- Improves public and fleet safety

Through the Internet of Things (IoT), AT&T Fleet Management for Enterprise enables you to optimize fleet routes, integrate compliance tools, minimize regulatory violations, and reduce fuel and maintenance costs.
and display metrics such as your least-driven asset, the most-driven asset, and the highest-idle asset. You'll be able to identify core problem areas and reduce maintenance costs by focusing on predictive engine health and preventive maintenance. Route optimization tools help decrease CO2 emissions and increase organizational efficiency. These reports and tools help you reduce business expenses, and run a highly secure safety-compliant fleet.

AT&T Fleet Management for Enterprise provides a solution customized to cover your needs today—while scaling easily to meet your evolving needs tomorrow.

With AT&T Fleet Management for Enterprise, your vehicles capture and send data from a multitude of sources—the engine, drivetrain, instrument cluster, and other subsystems. You get an incredibly rich trove of information. The software translates the data into reports, alerts, and recommendations—all in a powerful dashboard.

**Actionable vehicle data**

Near-real time data reveals insights into your fleet’s routes, usage, maintenance, and driver behavior.

From there, you can optimize daily routes, decrease idling, and improve driver performance. Proactive maintenance and diagnostics can prevent issues before they even become issues. You’ll also get your light-, medium-, and heavy-duty fleets regulation-ready on greenhouse gas emissions and fuel economy.

**Advanced compliance tools**

The software integrates compliance tools, such as Hours of Service (HOS), IFTA (International Fuel Tax Agreement) mileage collection, and DVIR (Driver Vehicle Inspection Report). You’ll be able to show up-to-date logbooks and reduce administrative costs. You can also improve CSA (Canadian Standards Association) safety ratings by managing factors that drive your HOS BASIC score.

**Accident detection**

Email, desktop, or mobile alerts notify the command center if there’s been an accident. Devices capture detailed forensic data for reconstruction of the event. Sensors can also detect reverse collisions.

**Compact & Durable**

- Width: 1.97”
- Height: 0.91”
- Length: 2.95”

**Innovative Technology:**

- Industry’s fastest GPS acquisition time
- In-vehicle driver coaching
- Vehicle fault diagnostics
- Detailed fuel usage data
- Instrument cluster data

The ability to provide an array of highly secure technology solutions configured to meet diverse and unique needs on a global scale give AT&T a powerful edge in fleet management.
