The right data can increase your fleet’s efficiency, productivity, and level of compliance.

Through the Internet of Things (IoT), AT&T Fleet Management for Enterprise enables you to optimize fleet routes, integrate compliance tools, minimize regulatory violations, and reduce fuel and maintenance costs.

As an enterprise, you face the constant, complex challenges of managing a fast-paced fleet for optimal efficiency and productivity—all while following strict protocols for regulatory compliance. AT&T Fleet Management for Enterprise provides virtual real-time data that helps you manage compliance, control costs, and optimize your fleet from one easy-to-use platform.

Productivity reports help you visualize fleet and driver activities.

Features
- One universal plug-and-play device for all vehicles
- Highly secure end-to-end data transfer
- Enhanced live-location tracking
- Web-based, interactive dashboards and customizable reports
- Performance, safety, and Hours of Service reporting
- Accident detection, notification, and reconstruction
- In-vehicle driver coaching

Potential Benefits
- Reduces costs for fuel, labor, and maintenance
-Addresses security and compliance requirements
- Helps maintain e-logs, HOS, DVIR, and IFTA mileage collection
- Increases employee and fleet productivity
-Reduces greenhouse gas emissions
- Decreases fraudulent fuel card expense using location, odometer reading, and MPG discrepancies
- Improves public and fleet safety

Through the Internet of Things (IoT), AT&T Fleet Management for Enterprise enables you to optimize fleet routes, integrate compliance tools, minimize regulatory violations, and reduce fuel and maintenance costs.
The ability to provide an array of highly secure technology solutions configured to meet diverse and unique needs on a global scale give AT&T a powerful edge in fleet management.
