Introducing AT&T Mobile Select Priority – Pooled — plans that help you stay connected and productive when it is most critical for business

Introducing AT&T Mobile Select℠ Priority – Pooled, the newest addition to our AT&T Mobile Select portfolio. In addition to the benefits of pooled data offered under all AT&T Mobile Select – Pooled plans, AT&T Mobile Select Priority – Pooled includes AT&T Dynamic Traffic Management. With AT&T Dynamic Traffic Management, users can prioritize their data on the AT&T-owned domestic 4G LTE network up to the amount of their plan’s data allowance. AT&T Mobile Select Priority – Pooled also includes Private Wi-Fi. With Private Wi-Fi, smartphone users can connect to and use unencrypted public Wi-Fi with greater confidence. AT&T Mobile Select Priority – Pooled is designed to help you stay connected and productive when it is most critical for business.

AT&T Mobile Select Priority – Pooled plans feature:

• Flexible Pooled Data – light users can help balance out heavy users within a single billing account*
• Unlimited number of domestic calls and texts
• Unlimited texting from the U.S. to over 120 countries
• Unlimited talk from the U.S. to Mexico & Canada
• No roaming charges for plan voice, text and/or standard data use while in Mexico**
• Stream Saver – Stream video content at Standard Definition quality, similar to DVD (about 480p), to help you conserve your data for other business critical needs***
• AT&T Dynamic Traffic Management*
• Private Wi-Fi—allow smartphones to connect more securely to unencrypted public Wi-Fi****

*Users’ AT&T Dynamic Traffic Management allotments do not pool and any remaining allotment on a user’s line does not rollover.
**Compatible device required. AT&T Dynamic Traffic Management not available in Mexico. Other restrictions apply.
*** AT&T will activate the feature for you and you may turn it off and back on at any time. Ability to stream & video resolution vary. Restrictions apply.
**** Requires a smartphone operating on a compatible iOS or Android operating system.
**What are the benefits of AT&T Dynamic Traffic Management?**

AT&T Dynamic Traffic Management gives users the ability to assign a higher priority to their business data traversing the AT&T-owned domestic 4G LTE network, prioritizing their business-critical data over lower priority traffic.

**Features:**

- An on-demand app prioritizes data with the press of a button on your smartphone or tablet*.
- Differentiated experience for data traffic over AT&T-owned domestic 4G LTE network providing more predictable wireless application performance.
- Quality of Service (QoS) Prioritization.
- Can be used up to the data allotment of each user’s plan (prioritization does not pool).
- Can be used with a variety of business solutions including:
  - AT&T Enhanced Push-to-Talk
  - AT&T Workforce Management

*Requires a 4G LTE capable device using the Android™ or iOS operating systems.

**What is pooled data***?

- Each user brings their own plan's data allowance to the data pool.
- Overages and underages are netted out at end of month.
- As users come and go, the data pool goes up and down depending on individual contribution.

* Pooled data enables a data pool consisting of CRU lines on Mobile Select Priority – Pooled plans or Mobile Select – Pooled plans or both within a single Billing Account. Each CRU line first uses its plan’s data allowance, then excess over usage incurs overage charges at the plan’s specified data overage rate. At end of billing cycle, any excess under usage in data pool is reallocated to help offset the per CRU line overage charges.

**Don't need AT&T Dynamic Traffic Management or Private Wi-Fi?** We also offer AT&T Mobile Select℠ – Pooled plans that do not include such features.

**What are the benefits of Private Wi-Fi***?

Private Wi-Fi connects smartphones to unencrypted public Wi-Fi with greater confidence, with two security features available through the Private Wi-Fi app.

- Private Wi-Fi VPN transforms unencrypted to encrypted by automatically creating a VPN as soon as your smartphone is connected. **
- Private Wi-Fi Alerts provide near real-time threat detection and alerts whenever a Wi-Fi vulnerability is detected on your smartphone, so you can disconnect to protect your business.

* Only available in the Domestic Coverage Area.
** May be blocked by certain video streaming apps, in which case the data will bypass or disconnect the VPN connection.

---

**AT&T Mobile Select℠ – Pooled plans feature:**

- **Flexible pooled data**
- **Stream Saver**– Unlimited number of domestic calls and texts
- **International perks**

Plans for smartphones, plans for feature phones and plans for connected wearables include:

- Unlimited texting from the U.S. to over 120 countries
- Unlimited talk from the U.S. to Mexico & Canada

Plans for smartphones and plans for feature phones also include:

- No roaming charges for plan data use while in Mexico

Plans for AT&T Wireless Home Phone and plans for AT&T Wireless Internet include:

- Unlimited talk from the U.S. to Mexico & Canada

Plans for eligible data-only devices that have a monthly service charge of $20 or more include:

- No roaming charges for plan data use while in Mexico

(Compatible devices required. Other restrictions apply.)

---

See pages 3-4 for pricing and terms.
Build your data pool

Does your sales team need 10GB Mobile Select Priority – Pooled plans for smartphones while your IT team needs the 3GB Mobile Select – Pooled plan for smartphones? You can mix and match devices, plans and data allotments within the same data pool.

Data Overage: Pay-per-use rate of $0.000009536/KB applies.
¹Only for smartphones in Domestic Coverage Area.
²Excludes routers and devices used for Wireless Wide Area Network connectivity. Connected vehicles have no plan usage in Mexico. Pay-per-use roaming rates apply.
³Basic and quick messaging phones only.
Additional AT&T Mobile Select – Pooled Plans for other devices:

You can also choose AT&T Mobile Select-Pooled plans for other eligible devices you wish to add to your account — these plans don’t have a dedicated data allowance to contribute to the data pool, but the devices can still benefit at the end of the bill cycle from any unused data from the larger pool.

Map depicts an approximation of outdoor domestic and Mexico coverage. Actual coverage may differ. Coverage and service not available everywhere. For most current coverage info, check wireless.att.com/coverageviewer.

AT&T Dynamic Traffic Management is only available for use on the AT&T domestic 4G LTE network.

AT&T MOBILE SELECT – POOLED PLANS: Prices are for service only. Eligibility: Available only to business and government customers with a qualified AT&T wireless service agreement and only for their Corporate Responsibility User (“CRU”) lines of service. For full service terms and conditions of service, see applicable wireless service agreement, including without limitation the Additional Service- and Equipment-Related Terms found at att.com/abs-additional-terms (“Business Agreement”). Devices: Sold separately. Installment plan charges and other device purchase costs are extra. A limit on the number of financed devices per wireless account may apply. Monthly Service Charges: The monthly service charges of Mobile Select – Pooled plans for smartphones that are purchased at full price, on a qualified installment agreement, bring your own, or on a month-to-month term are discounted by $25 per month as compared to the standard monthly service charges of plans for smartphones with a 2-year service commitment. The plan discount will appear as a credit on your bill. Loss of Monthly Service Charge Discount with 2-year Smartphone Upgrade: If upgrading to a smartphone with a 2-year service commitment, you will lose the plan discount for that CRU line. DATA: For use in the United States, Puerto Rico and U.S. Virgin Islands (the “Domestic Coverage Area” or “DCA”) only. Plans for phones and $20/mo. and higher plans for data-only devices also include data usage in Mexico for compatible data-only devices (see Mexico Service Restrictions below). Plans also include usage in Canada for select connected vehicles only. Additional or promotional data may not be available for use outside the DCA. Tethering and Mobile Hotspot: Use for up to 5 simultaneous devices. Tethering requires compatible device. Video Streaming: Includes the Stream Saver feature which allows you to save data on content it recognizes as video by streaming higher definition video in Standard Definition quality (about 480p) on compatible devices (unless the video provider has opted out). AT&T will activate the feature for you. Check your account online to see if the feature is active. Once active, you can turn it off or back on at any time online at wireless.att.com/business. Stream Saver will not recognize all video content. Ability to stream and video resolution may vary and be affected by other factors. Restrictions apply. See att.com/streamsafer for more details. Pooled Data: Within a single Billing Account Number (“BAN”), CRUs activated on Mobile Select – Pooled plans and/or Mobile Select Priority – Pooled plans that include pooled data are combined to create a “Data Pool.” Every billing cycle, each CRU first uses his or her plan’s included data allotment (“Data Allowance”), if any. If a CRU does not use all of the plan’s Data Allowance, it creates an underage in the amount of the unused Data Allowance (“Under Usage”). If a CRU uses more than the plan’s Data Allowance (e.g., any CRU with a 0GB plan), the CRU incurs Data Overage charges in the amount of the excess data usage.
CRUs can activate a session by launching the App and selecting a desired time duration, after which the session will end. During the session, AT&T notifies you when a Wi-Fi network you join with your smartphone appears to be risky or under attack. Wi-Fi Alerts automatically detects when your smartphone connects and application data traffic as it travels over open Wi-Fi hotspots. Private Wi-Fi VPN does not guarantee complete security for your data and may be blocked by certain video warranties, and AT&T and its suppliers make no representations of any kind, express or implied, with respect to Private Wi-Fi. May result in increased battery usage by your device. Certain App features are available on a subscription basis only. Private Wi-Fi is provided on an “as-is” basis with no warranties, and AT&T and its suppliers make no representations of any kind, express or implied, with respect to Private Wi-Fi. Pricing: Private Wi-Fi is included in the plan but is only available in the Domestic Coverage Area. Private Wi-Fi VPN: Private Wi-Fi VPN establishes a highly secure proxy within your smartphone to encrypt unencrypted web and application data traffic as it travels over open Wi-Fi networks. Private Wi-Fi VPN does not guarantee complete security for your data and may be blocked by certain video streaming apps, in which case the data will bypass or disconnect the VPN connection. To help ensure the service is properly provisioned, you may be requested to enable the “Location” feature on your smartphone. You must also separately give permission to allow the Private Wi-Fi VPN connection to be established. Wi-Fi Alerts: Wi-Fi Alerts notifies you when a Wi-Fi network you join with your smartphone appears to be risky or under attack. Wi-Fi Alerts automatically detects when your smartphone connects to a new network and runs a series of checks on that network to help ensure that it is behaving properly. If the network is deemed risky, the app will provide you with instructions detailing how to disconnect from the network.

AT&T MOBILE SELECT® PRIORITY – POOLED PLANS: Same eligibility, features and other terms and conditions as AT&T Mobile Select—Pooled Plans with the additional capabilities of AT&T Dynamic Traffic Management and Private Wi-Fi Application. AT&T DYNAMIC TRAFFIC MANAGEMENT: Feature uses quality of service (“QoS”) network technology to give CRU a differentiated (i.e., enhanced versus “best effort”) 4G LTE network experience for business data traffic originated on and traversing entirely over the AT&T-owned domestic 4G LTE network (i.e., excluding microcells, AT&T Wi-Fi service, and roaming partners’ networks). The feature does not include priority access to network resources or preemption. Device Requirements: Each line requires a 4G LTE-capable device using the Android™ or iOS operating systems and the use of the AT&T Dynamic Traffic Management App (the “App”). The feature does not provide priority access to available AT&T 4G LTE domestic network resources. Feature is intended for use for business application data traffic. Termination of Service: AT&T reserves the right to terminate, suspend or restrict the feature if use is inconsistent with its intended use, the EULA or the Business Agreement. PRIVATE WI-FI APPLICATION (“App”): Requires a smartphone operating on a compatible iOS or Android operating system. App may result in increased battery usage by your device. Certain App features are available on a subscription basis only. Private Wi-Fi is provided on an “as-is” basis with no warranties, and AT&T and its suppliers make no representations of any kind, express or implied, with respect to Private Wi-Fi. Pricing: Private Wi-Fi is included in the plan but is only available in the Domestic Coverage Area. Private Wi-Fi VPN: Private Wi-Fi VPN establishes a highly secure proxy within your smartphone to encrypt unencrypted web and application data traffic as it travels over open Wi-Fi networks. Private Wi-Fi VPN does not guarantee complete security for your data and may be blocked by certain video streaming apps, in which case the data will bypass or disconnect the VPN connection. You must also separately give permission to allow the Private Wi-Fi VPN connection to be established. Wi-Fi Alerts: Wi-Fi Alerts notifies you when a Wi-Fi network you join with your smartphone appears to be risky or under attack. Wi-Fi Alerts automatically detects when your smartphone connects to a new network and runs a series of checks on that network to help ensure that it is behaving properly. If the network is deemed risky, the app will provide you with instructions detailing how to disconnect from the network.
All offers, promotions, pricing, terms, restrictions & conditions subject to change & may be modified, discontinued or terminated at any time without notice.

GENERAL WIRELESS SERVICE TERMS: Subject to applicable Business Agreement. Service is not for resale & is intended for use primarily within the DCA. If AT&T does not enforce any of the terms or restrictions of its service offerings, it is not a waiver of the right to enforce those terms or restrictions. AT&T reserves the right to enforce all terms and restrictions at any time. AT&T determines your use of the services violates any of the applicable terms or policies found in the applicable Business Agreement, we may in our sole discretion suspend, modify, terminate, or restrict your service. Coverage: Coverage map shows high level approximation of areas included in and out of plan. For the most current coverage info for your area, check wireless.att.com/coverageviewer. Coverage may include areas that are served by unaffiliated carriers & not on AT&T’s owned and operated network (off-net). Coverage is subject to change without notice. Network Management: All AT&T service is subject to AT&T network management policies. See att.com/broadbandinfo for details. Off-Net Usage: International and domestic off-net (roaming) data usage may be at 2G speeds. Excessive Off-Net Usage: You get an off-net (roaming) usage allowance for each service. If you exceed the allowance, your service(s) may be restricted or terminated. Other Restrictions & Charges: Other restrictions apply and may result in service termination. If you purchased a device that requires a term commitment, an Early Termination/Cancellation Fee applies if you cancel CRU service after the first 30 days and before the CRU service term ends. See att.com/equipmentETF for details on what fee may apply for your device and how the fee is prorated over time. Activation/upgrade fee per line (up to $45) and deposit may apply. Credit approval may be required. AT&T reserves the right to suspend or terminate service to your account, place any non-complying device on an appropriate plan, and/or add any other required element of a plan. Other Monthly Charges: Apply per line & may include taxes, federal/state universal service charges, a Regulatory Cost Recovery Charge (up to $1.25), a gross receipts surcharge, an Administrative Fee, and other governmental assessments (including w/out limitation a Property Tax Allotment surcharge of $0.20 – $0.45 applied per CRU’s assigned number), which are not government-required charges. Additional one-time charges may apply. For full service terms and conditions, see the Business Agreement.

To take advantage of these great offers, contact your AT&T Representative or go online at att.com/mobileselect.
