Introducing AT&T Mobile Select Priority – Pooled — plans that help you stay connected and productive when it is most critical for business

Introducing AT&T Mobile Select™ Priority – Pooled, the newest addition to our AT&T Mobile Select portfolio. In addition to the benefits of pooled data offered under all AT&T Mobile Select – Pooled plans, AT&T Mobile Select Priority – Pooled includes AT&T Dynamic Traffic Management. With AT&T Dynamic Traffic Management, users can prioritize their data on the AT&T-owned domestic 4G LTE & 5G Evolution network up to the amount of their plan’s data allowance.* And now you can add your new 5G+ capable smartphones to the plan to access the AT&T 5G mmWave (5G+, also referred to as 5G) network, where available, which provides lower latency and ultra-fast speeds.** AT&T Mobile Select Priority – Pooled is designed to help you stay connected and productive when it is most critical for business.

AT&T Mobile Select Priority – Pooled plans feature:

- Flexible Pooled Data – light users can help balance out heavy users within a single billing account¹
- Unlimited number of domestic calls and texts
- Unlimited texting from the U.S. to over 120 countries
- Unlimited talk from the U.S. to Mexico & Canada
- No roaming charges for plan voice, text and/or standard data use while in Mexico²
- Access to the AT&T 5G+ network, where available, with your 5G+-capable device – speeds will be capped at 2Gbps.**
- Stream Saver – Stream video content at Standard Definition quality, similar to DVD (about 480p), to help you conserve your data for other business critical needs³
- AT&T Dynamic Traffic Management⁴
- Private Wi-Fi-to allow smartphones to connect more securely to unencrypted public Wi-Fi⁵

¹Users’ AT&T Dynamic Traffic Management allotments do not pool and any remaining allotment on a user’s line does not rollover.
²Compatible device required. Roaming usage may be a 2G speeds. AT&T Dynamic Traffic Management not available in Mexico. Other restrictions apply.
³AT&T will activate the feature for you and you may turn it off and back on at any time. Ability to stream video resolution vary. Restrictions apply.
⁴Requires a smartphone or tablet operating on a compatible Android or iOS operating system. Not available in Mexico.
⁵Requires a 4G LTE and/or 5G Evolution capable smartphone or tablet operating on a compatible Android or iOS operating system. Not available in Mexico.

See pages 3-4 for pricing and terms.
What are the benefits of AT&T Dynamic Traffic Management?

AT&T Dynamic Traffic Management gives users the ability to assign a higher priority to their business data traversing the AT&T-owned domestic domestic 4G LTE & 5G Evolution networks, prioritizing their business-critical data over lower priority traffic.

Features:

• An on-demand app prioritizes data with the press of a button on your compatible smartphone or tablet
• Differentiated experience for data traffic over AT&T-owned domestic domestic 4G LTE & 5G Evolution networks, providing more predictable wireless application performance*
• Can be used up to the data allotment of each user’s plan (prioritization does not pool)
• Can be used with a variety of business solutions including:
  » AT&T Enhanced Push-to-Talk
  » AT&T Workforce Management

* Feature usage with a 4G LTE-capable device is limited to the AT&T-owned domestic 4G LTE network; feature usage with a 5G Evolution-capable device is available on the AT&T-owned domestic 4G LTE & 5G Evolution networks. Not available on the 5G+ network.

What are the benefits of Private Wi-Fi*?

Private Wi-Fi connects smartphones to unencrypted public Wi-Fi with greater confidence, with two security features available through the Private Wi-Fi app.

• Private Wi-Fi VPN transforms opens Wi-Fi from unencrypted to encrypted by automatically creating a VPN as soon as your smartphone is connected. **
• Private Wi-Fi Alerts provide near real-time threat detection and alerts whenever a Wi-Fi vulnerability is detected on your smartphone, so you can disconnect to protect your business.

* Only available in the Domestic Coverage Area.
** May be blocked by certain video streaming apps, in which case the data will bypass or disconnect the VPN connection.

What is pooled data*?

• Each user brings their own plan’s data allowance to the data pool.
• Overages and underages are netted out at end of month.
• As users come and go, the data pool goes up and down depending on individual contribution.

* Pooled data enables a data pool consisting of CRU lines on Mobile Select Priority – Pooled plans or Mobile Select – Pooled plans or both within a single Billing Account. Each CRU line first uses its plan’s data allowance, then excess over usage incurs overage charges at the plan’s specified data overage rate. At end of billing cycle, any excess under usage in data pool is reallocated to help offset the per CRU line overage charges.

Don’t need AT&T Dynamic Traffic Management or Private Wi-Fi? We also offer AT&T Mobile SelectSM – Pooled plans that do not include such features.

AT&T Mobile SelectSM – Pooled plans feature:

• Flexible pooled data
• Stream Saver
• Unlimited number of domestic calls and texts
• International perks:
  Plans for smartphones, plans for feature phones and plans for connected wearables include:
  • Unlimited texting from the U.S. to over 120 countries
  • Unlimited talk from the U.S. to Mexico & Canada

Plans for smartphones and plans for feature phones also include:

• No roaming charges for plan data use while in Mexico

Plans for AT&T Wireless Home Phone and plans for AT&T Wireless Internet include:

• Unlimited talk from the U.S. to Mexico & Canada

Plans for eligible data-only devices that have a monthly service charge of $20 or more include:

• No roaming charges for plan data use while in Mexico

(Compatible devices required. Other restrictions apply.)
### AT&T Mobile Select℠ Priority – Pooled Plans

**Build your data pool**

Does your sales team need 10GB Mobile Select Priority – Pooled plans for smartphones while your IT team needs the 3GB Mobile Select – Pooled plan for smartphones? You can mix and match devices, plans and data allotments within the same data pool.

Taxes, fees & other monthly charges extra.

**Data Overage:** Pay-per-use rate of $0.0000009536/KB applies.

¹ Only for compatible smartphones and tablets and only on the AT&T-owned domestic 4G LTE & 5G Evolution networks up to data allowance; allotment does not pool.

² Only for smartphones in Domestic Coverage Area.

³ May not be used with 5G or 5G+ capable devices.

⁴ **Data-Only Devices:** tablets, laptops, LaptopConnect/aircards, netbooks, cases, mobile hotspot devices and select other data-only devices. Excludes routers and devices used for Wireless Wide Area Network connectivity. Pay-per-use roaming rates apply.

⁵ Basic and quick messaging phones only.
Additional AT&T Mobile Select – Pooled Plans for other devices:

You can also choose AT&T Mobile Select-Pooled plans for other eligible devices you wish to add to your account — these plans don’t have a dedicated data allowance to contribute to the data pool, but the devices can still benefit at the end of the bill cycle from any unused data from the larger pool.

Data Overage: Pay-per-use rate of $0.000009536/KB applies.

*Connected Devices: Cameras, game consoles and select other data-only connected devices. Connected Devices have no plan usage in Mexico. Pay-per-use roaming rates apply.

**Connected Wearable: is a wireless phone designed to be worn that is capable of making/receiving calls without being connected to another wireless device. Messaging requires compatible device. Connected Wearables have no plan usage in Mexico. Pay-per-use roaming rates apply.

***Wireless Home Phone and AT&T Wireless Internet devices have no plan usage in Mexico. Pay-per-use roaming rates apply.

Coverage nationwide & beyond

International Perks

• Unlimited text to the world
• Unlimited talk to Mexico and Canada
• Plan use in Mexico with no roaming charges

AT&T Domestic Coverage
AT&T Mexico Coverage
No Service Area

Map depicts an approximation of outdoor domestic and Mexico coverage. Actual coverage may differ. Coverage and service not available everywhere. For most current 4G LTE and other coverage info, check wireless.att.com/coverageviewer. For 5G Evolution coverage info, check att.com/5GEvolution. For 5G+ coverage info, check att.com/5gfordyou.

AT&T Dynamic Traffic Management is only available for use on the AT&T-owned domestic 4G LTE & 5G Evolution network.

AT&T MOBILE SELECT – POOLED PLANS: Prices are for service only. Eligibility: Available only to business and government customers with a qualified AT&T wireless service agreement and only for their Corporate Responsibility User (CRU) lines of service. For full service terms and conditions of service, see applicable wireless service agreement, including without limitation the Additional Service- and Equipment-Related Terms found at att.com/abs-additional-terms (Business Agreement); Monthly Service Charge Discount: If you activate a smartphone that is purchased at full price, on a qualified installment agreement, on a month-to-month term, or bring your own, the monthly service charge for your Mobile Select – Pooled plan will be discounted by $25 per month as compared to the standard monthly service charge for the plan that applies if you activate a smartphone that is purchased with a 2-year service commitment. If you qualify, the monthly service charge discount will appear as a credit on your bill. Loss of Monthly Service Charge Discount with 2-year Smartphone Upgrade: If upgrading to a smartphone with a 2-year service commitment, you will lose any monthly service charge discount for that CRU line. Devices: Eligible devices sold separately. Mobile Select: - Pooled plans may not be used with 5G or 5G+ devices. Installment plan charges and other device purchase costs are extra. A limit on the number of financed devices per wireless account may apply. DATA: For use in the United States, Puerto Rico and U.S. Virgin Islands (Domestic Coverage Area or DCA) only. Plans for phones and $20/mo. and higher plans for data-only devices also include data usage in Mexico for compatible data-only devices (see Mexico Service Restrictions below). Plans also include usage in Canada for select connected vehicles only. Additional or promotional data may not be available for use outside the DCA. Tethering and Mobile Hotspot: Use for up to 5 simultaneous devices. Tethering requires compatible device. Video Streaming: Includes the Stream Saver feature which allows you to save data on content it recognizes as video by streaming higher definition video in Standard Definition quality (about 480p) on compatible devices (unless the video provider has opted out). AT&T will activate the feature for you. Check your account online to see if the feature is active. Once active, you can turn it off or back on at any time online at wireless.att.com/business. Stream Saver will not recognize all video content. Ability to stream and video resolution may vary and be affected by other factors. Restrictions apply. See att.com/streamsaver for more details. Pooled Data: Within a single billing account number (BAN), CRUs activated on Mobile Select: - Pooled plans, Mobile Select Priority - Pooled plans and/or other Mobile Select plans that include pooled data are combined to create a “Data Pool.” Every billing cycle, each CRU first uses his or her plan’s included data allotment (Data Allowance), if any. If a CRU does not use all of the plan’s Data Allowance, it creates an underage in the
amount of the unused Data Allowance. (Under Usage). If a CRU uses more than the plan's Data Allowance (e.g., any CRU with a 0GB plan), the CRU incurs Data Overage charges in the amount of the excess data usage. (Over Usage). At the end of the billing cycle, AT&T calculates and total the Under Usage amounts for CRU in the Data Pool and the total Over Usage amounts for CRU in the Data Pool and then compares the two totals. If the total Under Usage amount exceeds the total Over Usage amount (and the total Under Usage amount is greater than zero), the Under Usage is allocated among CRU in the Data Pool with Over Usage, resulting in per line credits on your invoice equal to each such CRU line's Data Overage amount. Any remaining excess Under Usage will be forfeited. If the total Over Usage amount exceeds the total Under Usage amount (and the total Under Usage amount is greater than zero), the Under Usage is divided by the Over Usage to create an allocation factor that is applied equally to each CRU's Data Overage charges to determine each such CRU line's share of the total Under Usage amount, resulting in per line credits on your invoice to partially offset each such CRU's Data Overage charges. For example, if a Data Pool has 100 KB of Under Usage and 1000 KB of Over Usage (which means an allocation factor of 1/10), then your invoice will show, with respect to each CRU line with Over Usage, both (a) the CRU's Data Overage charges for the Over Usage at the specified Data Overage rate, and (b) a bill credit equal to 10% of the CRU's Data Overage charges. Changing or migrating CRU lines to pooled data plans during a bill cycle may result in one-time prorations or other minor impacts to the credit calculation. If your Organization's foundation account number (FAN) has multiple BANs, you may have one Data Pool for each BAN under the FAN; however, CRU lines in one Data Pool cannot take advantage of another Data Pool's Under Usage, and each CRU line can only be part of one Data Pool at a time. AT&T reserves the right to limit the number of CRU lines in a Data Pool due to business needs and system limitations. Data Overage: If you exceed the total amount of data in your Data Pool during your billing period, a pay-per-use rate of $0.0000009536 per kilobyte (KB) will apply. 1.024 KB = 1megabyte (MB); 1,048,576 KB = 1 gigabyte (GB). UNLIMITED TALK: For phones and Connected Wearables only. Includes unlimited calls within the DCA (plans for phones also include calls within Mexico). Service may be terminated for excessive roaming (see Business Agreement). Unlimited Nationwide Calling: For WHP and WHPI only. Includes long distance calls within and from the DCA to the DCA, Guam and Northern Mariana Islands. Unlimited Talk to Canada and Mexico: For phones, Connected Wearables, WHP and WHPI only. Includes unlimited International Long Distance (ILD) calling from DCA to Canada and Mexico only. You may be charged for calls to special or premium service numbers. Calls to Other Countries: Plans for phones, Connected Wearables, WHP and WHPI include ILD calling from the DCA (plans for phones also include calling from Mexico) to countries other than Canada & Mexico. Per minute pay-per-use rates apply to an ILD service package added to the CRU line plan. Rates subject to change without notice. For rates, see att.com/worldconnect. Wireless Home Phone (WHP): A wireless voice service (Commercial Mobile Radio Service or CMRS). WHP devices are no longer available for purchase from AT&T. AT&T Wireless Internet (AWI): Is a wireless voice service (CMRS) & mobile broadband internet access service. For AWI details visit att.com/wirelessinternet. WHP & AWI General: Excluded for emergencies. For emergency calls, provide location to 911 operator. Devices have backup battery but landline equipment with separate power will not place/receive calls (including 911) during outage. Not compatible with landline dependent services like medical alert monitoring systems. Other compatibility limitations apply. Mexico Service Restrictions: Plan usage not available in Mexico on Connected Devices, Connected Wearables, connected vehicles, WHP, WHPBI and any AT&T Mobile Select – Pooled plans for Data-Only Devices that include less than 10GB of data. Pay-per-use roaming rates will apply for such devices and plans. Business Agreement Discounts: Plans that have a monthly service charge of less than $35 are not eligible for any CRU service discount described in the Business Agreement. Invoicing Limitation: Plans are not eligible for combined (wireless/wireline) billing.

**AT&T Mobile Select Priority Pooled Plans**

Same eligibility, functionality and features as AT&T Mobile Select – Pooled Plans with the additional capabilities of (a) access to the AT&T 5G mmWave (5G+ may also be referred to as 5G) network, (b) AT&T Dynamic Traffic Management®, and (c) Private Wi-Fi Application. Devices: Eligible devices (including 5G and 5G+ devices) sold separately. Installment plan charges and other device purchase costs are extra. A limit on the number of financed devices per wireless account may apply. 5G+ NETWORK ACCESS & COVERAGE: Requires a 5G+ capable device. 5G coverage is not available in most areas; it is available in very limited parts of specific cities. See att.com/5Gforyou for details. Each CRU line may use AT&T Dynamic Traffic Management up to the amount of its Data Allowance; feature usage allocations are limited to its respective data plan. All CRU lines in a Data Pool do not share common bandwidth. AT&T Dynamic Traffic Management: Feature uses quality of service (QoS) network technology to give CRU a differentiated (i.e., enhanced versus “best effort”) network experience for business data traffic originating on and traversing entirely over the AT&T-owned domestic 4G LTE & 5G Evolution networks (excluding microcells, AT&T Wi-Fi service, roaming partners’ networks and AT&T 5G network). The feature does not include priority access to network resources or preemption. Device Requirements: Each line requires a 4G LTE - or 5G Evolution-capable smartphone or tablet using the Android or iOS operating systems and the use of the AT&T Dynamic Traffic Management App (ADTM App). ADTM App: Allows CRUs the ability to invoke AT&T Dynamic Traffic Management on an on-demand basis for the duration of a session initiated and terminated by the CRU. CRUs must download the ADTM App onto their qualified wireless devices from generally available app stores, such as Apple iTunes® and Google Play®. The ADTM App requires Customer and individual CRUs to accept the terms of an End User License Agreement (EULA) prior to use. The terms of the EULA are located at www.att.com/adtmmobile. CRUs can activate a session by launching the ADTM App and selecting a desired time duration, after which the session will end. During the session, all of a CRU’s data traffic will be given a higher Quality of Service (QoS) indicator after which their data traffic will remain being treated on a “best efforts” basis, unless the session is extended by CRU. Usage Limitation: Each line may use AT&T Dynamic Traffic Management up to the amount of its Data Allowance; feature usage allocations do not pool and do not rollover. After Data Allowance is exhausted, all CRU traffic will be handled on a “best-efforts” basis until the beginning of the next billing cycle. Limitations: Feature is available only within the DCA and only for data traffic originating on and traversing over the AT&T-owned domestic 4G LTE network or 5G Evolution network or both, depending on your device. Feature does not prioritize CRU’s data traffic ahead of all other data traffic, as other data traffic may receive a similar or higher quality of service. Feature does not provide priority access to available AT&T 4G LTE & 5G Evolution domestic network resources. Feature is intended for use for business application data traffic. Termination or Suspension: AT&T reserves the right to terminate, suspend or restrict the feature if use is inconsistent with its intended use, the EULA or the Business Agreement. PRIVATE WI-FI APPLICATION (PWF App): Requires a smartphone operating on a compatible iOS or Android operating system. PWF App may result in increased battery usage by your device. Certain PWF App features are available on a subscription basis only. Private Wi-Fi is provided on an “as-is” basis with no warranties, and AT&T and its suppliers disclaim all representations of any kind, express or implied, with respect to Private Wi-Fi. Limitations: Available only within the DCA. Private Wi-Fi VPN: Private Wi-Fi VPN establishes a highly secure proxy within your smartphone to encrypt unencrypted web and application data traffic as it travels over open Wi-Fi hotspots. Private Wi-Fi VPN does not guarantee complete security for your data and may be blocked by certain video streaming apps, in which case the data will be transmitted directly over the VPN connection. To help ensure the session is properly provisioned, you may be requested to enable the “Location” feature on your smartphone. You must also separately give permission to allow the Private Wi-Fi VPN connection to be established. Wi-Fi Alerts: Wi-Fi Alerts notifies you when a Wi-Fi network youjoin with your smartphone appears to be risky or under attack. Wi-Fi Alerts automatically detects when your smartphone connects to a new network and runs a series of checks on that network to help ensure that it is behaving properly. If the network is deemed risky, the PWF App will provide you with instructions detailing how to disconnect from the network. All offers, promotions, pricing, terms, restrictions & conditions subject to change & may be modified, discontinued or terminated at any time without notice.
GENERAL WIRELESS SERVICE TERMS: Subject to applicable Business Agreement. Service is not for resale & is intended for use primarily within the DCA. If AT&T does not enforce any of the terms or restrictions of its service offerings, it is not a waiver of the right to enforce those terms or restrictions. AT&T reserves the right to enforce all terms and restrictions at any time. AT&T determines your use of the services violates any of the applicable terms or policies found in the applicable Business Agreement, we may in our sole discretion suspend, modify, terminate, or restrict your service. Coverage: Coverage map shows high level approximation of areas included in and out of plan. For the most current coverage info for your area, check wireless.att.com/coverageviewer. Coverage may include areas that are served by unaffiliated carriers & not on AT&T’s owned and operated network (off-net). Coverage is subject to change without notice. Network Management: All AT&T service is subject to AT&T network management policies. See att.com/broadbandinfo for details. Off-Net Usage: International and domestic off-net (roaming) data usage may be at 2G speeds. Excessive Off-Net Usage: You get an off-net (roaming) usage allowance for each service. If you exceed the allowance, your service(s) may be restricted or terminated. Other Restrictions & Charges: Other restrictions apply and may result in service termination. If you purchased a device that requires a term commitment, an Early Termination/Cancellation Fee applies if you cancel CRU service after the first 30 days and before the CRU service term ends. See att.com/equipmentETF for details on what fee may apply for your device and how the fee is prorated over time. Activation/upgrade fee per line (up to $45) & deposit may apply. Credit approval may be required. AT&T reserves the right to suspend or terminate service to your account, place any non-complying device on an appropriate plan, and/or add any other required element of a plan. Other Monthly Charges: Apply per line & may include taxes, federal/state universal service charges, a Regulatory Cost Recovery Charge (up to $1.50 ), a gross receipts surcharge, an Administrative Fee, and other governmental assessments (including w/out limitation a Property Tax Allotment surcharge of $0.20-$0.45 applied per CRU’s assigned number), which are not government-required charges. Additional one-time charges may apply. For full service terms and conditions, see the Business Agreement.
