Device sanitization and privacy

Get peace of mind knowing data left on the device has been removed and destroyed.

The AT&T Business Trade-In program helps you get the newest devices faster—and with less out-of-pocket costs. The program enables you to turn in your old wireless devices that you no longer need and receive credit for the value of the device—applied directly to your AT&T account.

What happens after your device trade-in?

Each device we receive is individually handled with great care by trained professionals in our secure collection facility. We use a variety of theft prevention and surveillance tools to protect devices that have been returned. Sensitive data, contact lists, call history, text messages, pictures, and videos are systematically removed through a stringent multi-step process clearing the devices.

We are committed to the careful handling and erasing of sensitive data from mobile devices, offering peace of mind to our customers.
Data security

We follow a rigorous, multi step data sanitization process to remove and destroy all customer data on devices. Devices that cannot be confirmed “data clear” are destroyed and recycled.

Key standards compliance

- Environmental Protection Agency-recognized R2 standard
- NIST (National Institute of Standards & Technology) 800-88 Guidelines for Media Sanitization
- Compliant with HIPAA healthcare legislation “data clear” requirements
- AT&T strives to achieve a zero-landfill policy by keeping solids out of our landfills

AT&T Business Trade-In program

**Receiving**

SIM and memory cards are removed, and shredded on-site. Devices are then checked against lost/stolen database, with serialized tracking that helps ensure devices are moved safely through the entire process.

**Inspection**

Devices pass thru Quality Control, and then a portion receive an additional Quality Audit to validate all steps have been properly executed.

**Data Sanitization**

Leading-edge software is used to clear data from devices. Many trained staff members are fully dedicated to this step.

**Warehousing**

Devices are sorted and stored in a dedicated and secured area where cameras and security staff safeguard the area.

**Recycling**

Devices that cannot be fully processed are responsibly recycled. Our program is R2:2008 certified, an electronics industry Responsible Recycler certification.
