

Keep teams, fans, and staff highly secure

AT&T Cybersecurity Consulting can help you get over the goal line by:

- Connecting your business and security goals
- Driving faster, more efficient security response
- Knowing and improving your security posture

At AT&T, we help sports and entertainment venues minimize risks, manage security operations, and meet compliance requirements.

For sports teams and entertainment venues, cybersecurity professionals are inundated with alerts and information from a growing number of siloed point solutions. Venues and arenas contain hundreds of known and unknown vulnerabilities that allow threats to target critical business services such as point of sale (POS), IT infrastructures, and visitors' devices. Teams, coaches and athletes themselves are also vulnerable to data loss as it pertains to athletic performance, competitive advantage, and personal information.

Industry insights from the pros who know

According to The 2019 Gartner CIO Agenda survey:

- Digital initiatives and growth are the two top business priorities for CIOs
- According to 40 percent of CIOs surveyed, consumers' evolving demands are the driving force behind business model changes
- 95 percent of CIOs expect cybersecurity threats to get worse

AT&T offers expertise and implementation of services around applications, payments, PCI security, as well as advanced threats such as spear phishing, phishing, DDoS attacks, and insider theft. Our consultants help identify and prevent threats to your retail environment while also seeing to it that critical systems are optimally designed, implemented, and supported.

Current cybersecurity challenges	AT&T Cybersecurity solutions
<ul style="list-style-type: none"> • Protect point-of-sale systems in concessions and merchandise locations • Meet PCI compliance requirements • Protect data via 24/7 network and endpoint monitoring 	<ul style="list-style-type: none"> • PCI compliance assessment • Vulnerability and threat management • Managed threat detection and response • Industry standards assessment • Security maturity benchmarking
<ul style="list-style-type: none"> • Baseline security of your sports ecosystem and assist in determining risk 	<ul style="list-style-type: none"> • Cyber risk posture assessment • Vulnerability scanning services • Penetration testing services • Firewall rules and planning
