Give employees the internet connection they need to work from home

**AT&T Home Office Connectivity** provides employees with business-class internet, so they can access the applications they need to help keep your business running in the new work-from-home model.

As more employees are working remotely, your business needs to deliver consistent, highly secure connectivity to help employees maintain performance.

**This solution provides:**
- A separate network connection to take employees off their personal internet
- Business continuity between employees working at home and in the office
- All at great value and easy to order

**Features:**
- **AT&T High Speed Internet – Enterprise**
  - Fast, highly secure, highly reliable
  - Speeds up to 1Gbps with no data caps
  - Symmetric/asymmetric connection available for fiber-based services
  - Dynamic/static IP addressing options
  - Single contract
  - On-site installation
  - Consolidated invoice for multiple locations
  - Enterprise customer care

**Optional:**
- **Global Security Gateway Select (GSG)**
  - Endpoint protection
  - Advanced threat protection
  - Deep packet inspection
  - Cloud Access Security Broker (CASB) and Data Loss Prevention (DLP) solutions
  - Compatible with SD-WAN

**AT&T Internet Backup**
- Higher reliability via automatic failover on our wireless network

*If AT&T High Speed Internet–Enterprise is not currently available in your area, AT&T can provide you with AT&T Wireless Broadband.

Contact your sales representative or call 855-846-7933 for more details on AT&T Home Office Connectivity.

**Terms and conditions:** **AT&T High Speed Internet–Enterprise (HSIA-E)** is a broadband internet access service provided on AT&T owned fiber and copper facilities within a twenty-one state footprint. HSIA-E provides asymmetric and symmetric access speeds up to 1 Gbps. The Service is composed of an internet access line (Service Component) and AT&T Equipment. AT&T owns the Equipment and will replace it if necessary. Service availability depends on site address and is subject to change.

HSIA-E Service requires a professional installation. Professional installation includes the delivery of the AT&T Equipment along with any necessary filters, splitters, jacks or basic wiring. AT&T will make commercially reasonable efforts to provision HSIA-E. However, provisioning of Service is contingent upon the availability of local access to Customer's location. Customer understands that the actual bandwidth delivered is not determined until the time of service installation. In the event of trouble with the Service, Customer is responsible for reporting the trouble and participating in on-site cooperative testing with AT&T HSIA-E Customer Care to assist in the diagnosis of the trouble.

The HSIA-E Minimum Payment Period per Service Component is 12 months. In the event Customer terminates the Service before the minimum payment period requirement, Customer is responsible for paying early termination charges in accordance with the Customer’s Service Agreement. Multiple internet connections, unless protected by an internet security product or service, may significantly decrease Customer’s overall network security level.

AT&T maintains a comprehensive Privacy Policy that applies to uses of AT&T products and services, as well as the use of its website. AT&T’s Privacy Policy is available at [https://about.att.com/csr/home/privacy/full_privacy_policy.html](https://about.att.com/csr/home/privacy/full_privacy_policy.html). Please refer to the AT&T High Speed Internet – Enterprise Business Service Guide at [http://serviceguidenew.att.com/~g FlaskPlayerPage.cms](http://serviceguidenew.att.com/~g FlaskPlayerPage.cms) for a full service description including terms and conditions.
