BRIDGING COMMUNITIES

Affordable solutions to connect students, teachers, library patrons & underserved constituents.
Cities, counties, states and schools across the country are embracing the promise of a return to better, not just normal. At the center of this unprecedented transformation is the opportunity to help close the homework gap and narrow the digital divide. Bridging communities and reimagining the future of schools is a primary goal for educators, government leaders, policymakers and AT&T.

Connectivity has the power to help public servants and professors address learning loss, remove barriers, and improve economic & education equity. And for over 140 years, connectivity has been at the core of everything we do. No company is more invested in America’s future than AT&T.

That’s why we are committed to providing affordable options for Education institutions, Libraries and Government entities to connect students, teachers, library patrons and underserved constituents. By delivering comprehensive and agile solutions, we can help bridge communities today to deliver a better tomorrow.
UNDERSTANDING THE OFFER

Education institutions, Libraries and Government entities want flexible options to best serve their students, patrons and underserved constituents. And we understand that community needs vary county to county, coast to coast. This offer delivers a wide range of services so Administrators and IT leaders can select a solution that is tailored to their needs, while also meeting important budget and operational requirements.

AT&T Bridging Communities Plans

Since wireless data use varies program to program—from hybrid and virtual learning to services for adult seniors versus the temporary needs of library patrons—we're offering two wireless data options to meet the varied needs of your community:

- AT&T Bridging Communities Unlimited plan for $15/month per line (after up to $10/mo. bill credit), or
- AT&T Bridging Communities 10GB plan for $10/month per line (after up to $10/mo. bill credit.

Education institutions, Libraries and Government entities also have the flexibility to purchase connected devices (tablet, iPad, laptop, or mobile hotspot device) provided by AT&T or bring their own devices (BYOD) when activating them on one of these data plans.

In addition, these wireless data plan options are available for eligible customers that migrate existing AT&T lines or activate new lines for their students, teachers, patrons or underserved constituents.

For the AT&T Bridging Communities Unlimited plan, after 50GB of data usage on a line in a bill cycle, AT&T may temporarily slow data speeds on that line if the network is busy.

- The great news is our network continues to perform extraordinarily well. We continuously monitor bandwidth usage with tools that analyze and correlate network statistics. This is standard practice for us, and you can learn more by visiting this site.

For the AT&T Bridging Communities 10GB plan, after 10GB of data usage on a line in a bill cycle, we will slow data speeds on that line to a maximum of 256kbps for the remainder of the bill cycle.

While we all enjoy streaming, we also understand the guiding priorities of government programs and that classroom time is about learning. That's why we've included video streaming controls in the data rate plans to help.

- For content we can identify as video, wireless streaming speeds will be limited to Standard Definition quality (max 1.5Mbps), similar to DVD.
- Rest assured, however, that interactive conferencing applications and services—typically used for online learning, workforce development, research, job search and more—are not impacted by the video streaming controls.

Content Filtering Options for student & citizen internet access:

To help you implement your internet safety policies, we offer two content filtering services for Education institutions, Government entities and Libraries:

- Enterprise Traffic Protector ($1/mo. per line) can be used as part of a plan to filter Internet sites, so that domains classified as inappropriate can be blocked by an acceptable use policy. To learn more about Enterprise Traffic Protector, visit here.
- AccessMyLAN ($6/mo. per line after credits) is a mobile security and management service that allows Administrators to manage the internet sites users can access to help protect them from unsafe content, malicious sites, malware, and hacking attempts. To learn more about AccessMyLAN, visit here.

Enterprise Traffic Protector and AccessMyLAN can be used by K-12 schools and libraries to help comply with the Children’s Internet Protection Act (CIPA) when seeking funding under the E-rate or Emergency Connectivity Fund programs. K-12 schools and libraries are solely responsible for determining whether use of Enterprise Traffic Protector (using either the shared or private APN option) or AccessMyLAN satisfies their CIPA requirements under the E-rate or Emergency Connectivity Fund programs.
Supporting budget needs & holiday breaks:
We understand that Government & Library programs have budget cycles and Education institutions need flexibility during summertime or holidays. That’s why customers can also temporarily suspend service to each AT&T Bridging Communities line for up to 3 months in a rolling 12-month period.

- During the suspension, the monthly service charge for the AT&T Bridging Communities Unlimited plan or AT&T Bridging Communities 10GB plan will be reduced to $0.01/month.
- If customers select Enterprise Traffic Protector or AccessMyLAN, the monthly charges for these services will also be waived and bill credits, if applicable, will be suspended.
- Installment agreement charges for equipment, if any, are not eligible for temporary suspension.

Services to ensure seamless operations:
As communities face the promise and challenges of connecting underserved citizens, library patrons and students, top of mind for state & local agencies, libraries, educators, and policymakers is providing the necessary operational support to successfully implement these programs.

From parents working essential jobs into the night while students tackle research for a book report to adult seniors without broadband access or financial resources—providing connectivity and device support services is fundamental to the success of these programs.

- AT&T Education and Administrative Support Services ($4.95/mo. per line) can help by delivering a full-suite of professional services to ensure that students, families and citizens receive the assistance they need to keep their connectivity and devices up and running.⁴
- AT&T Education and Administrative Support Services can also help manage device logistics to offload the strain for Education, Library and Government Administrators and IT departments.
- To learn more about AT&T Education and Administrative Support Services, visit here.⁴
Connected device options for every application:

Government, Library and Education IT leaders know that one size does not fit all when it comes to connected devices. Whether the mission is to deliver 1:1 learning for K-12 schools, support Pell Grant students attending college, connect public housing or library patrons, or provide internet access for seniors—the right device is essential to ensure success. That's why AT&T provides a large selection of tablets, iPads, laptops, and mobile hotspot devices, including but not limited to:

**Moxee Mobile Hotspot**
- Perfect for students and constituents that need the added flexibility to move easily from one location to another and remain connected.
- With a long lasting, rechargeable 2,300 mAh battery, users can maintain productivity and keep devices connected for longer with the Moxee's extended charge.
- Qualifying Education institutions, Libraries and Government entities can get a Moxee mobile hotspot device at no cost, after credits, when purchased on a 12-month or 24-month installment agreement with an eligible AT&T Bridging Communities plan, while supplies last.

- **MSRP $84.99; 24-month 0% APR installment plan $3.54/mo.**
- To learn more about the Moxee, visit [here](#).

**iPad 9th generation**
- The A13 Bionic chip can easily power essential apps so students and constituents can edit a document while researching on the web and participate on a conference call, all at the same time.
- Features include an 8MP wide back camera and a 1.2MP FaceTime HD front camera.

- **MSRP $459.99; 24-month 0% APR installment plan $19.17/mo.**
- To learn more about the iPad 9th generation, visit [here](#).
Samsung Galaxy Tab A7 Lite
- The compact, slim design and vivid display make it easy for students and constituents to stay connected without Wi-Fi.
- Features include an 8.7-inch HD with Corning® Gorilla® Glass 3, an 8MP back camera and 2MP front camera, with up to 11 hours battery life on a single charge, depending on usage and based on laboratory testing including a mix of audio and video streaming.
- MSRP $199.99; 24-month 0% APR installment plan $8.33/mo.
- To learn more about the Samsung Galaxy Tab A7 Lite, visit here.

Samsung Galaxy Chromebook Go
- With this connected Chromebook, students and constituents can do work practically anywhere, even without Wi-Fi access.
- Features include a large 14-inch screen, 1MP front camera, with up to 12 hours battery life on a single charge, depending on usage and network configuration.
- MSRP $349.99; 24-month 0% APR installment plan $14.58/mo.
- To learn more about the Samsung Galaxy Chromebook Go, visit here.

Lenovo 300e Chromebook LTE
- Students and constituents can benefit from using this flexible connected Chromebook for work and assignments practically anywhere, even without Wi-Fi access.
- Features include an 11.6-inch HD Touch Display and 1MP front camera.
- MSRP $419.99; 24-month 0% APR installment plan $17.50/mo.
- To learn more about the Lenovo 300e Chromebook LTE, visit here.
The offers are available for public and private Education institutions, Libraries and Government entities with a qualified wireless service agreement to connect students and staff/teachers, library patrons and/or underserved constituents. AT&T Education and Administrative Support Services require a separate agreement.

Max $10 in bill credits towards the AT&T Bridging Communities Unlimited plan charge is applied each month. Existing data plan credits may already be available under the agreement/FAN. If customer has existing credits on the $25/mo. data plan, the monthly credit available from this offer will be reduced so that price of plan is not lower than $15/mo. per line. Max $10 in bill credits towards the AT&T Bridging Communities 10GB plan charge is applied each month. Existing data plan credits may already be available under the agreement/FAN. If customer has existing credits on the $20/mo. data plan, the monthly credit available from this offer will be reduced so that price of plan is not lower than $15/mo. per line. The $6/mo. per line price for AccessMyLAN is achieved through bill credits that apply to all eligible lines. This offer is terminated.

$0 Moxie Device Offer:

Eligible lines will receive a new or an eligible new or migrated line of AT&T Bridging Communities Unlimited or AT&T Bridging Communities 10GB plan and $85 on a 0% APR 12 or 24-month installment agreement. The device is $0 after credits over the term of the installment agreement. Taxes are due on the full device price at sale.
