

Compatible connectivity devices for AWB

AT&T Wireless Broadband requires a connectivity device (either a hotspot or router). You can purchase one from AT&T or bring your own device (BYOD). The following table lists AT&T stocked devices compatible with AT&T Wireless Broadband plans.

General guidelines for compatibility with AT&T Wireless Broadband are that the device supports a minimum of CAT 11 or includes 5G. Due to the number of devices supported that AT&T supports, listed below are the commonly used routers.

For additional support, please contact an AT&T business expert at: 800.331.0500

AT&T Stocked devices

Device	Model
