AT&T Guide to Integrated Field Solutions

Tap anywhere to begin
Optimize and Differentiate Your Business with Integrated and Mobile Solutions

To succeed in today's business environment, you need to know much more than just the physical location of your vehicles, mobile assets and field employees. You need access to the details that matter and the ability to act on that information immediately.

Gain Insight Into Your

**Employees**
- What are they doing?
- Are they collecting the necessary job information?
- Who can I quickly deploy to solve an urgent issue?

**Vehicles**
- Are our drivers choosing the most efficient routes?
- Are they complying with relevant regulations?
- Is their time being logged accurately?

**Assets**
- Are we maximizing their utilization?
- Are they secure?

Instantly communicate with your field workers.
Combine insight and access to set your business apart.
AT&T Mobile Field Solutions lets you analyze relevant, up-to-date information from people, vehicles and assets to help drive insights, reduce operational costs and uncover new growth opportunities.

- Mobile Data Collection and Reporting

People, Vehicles, & Assets: Mobile and Connected by our Solutions
AT&T Mobile Field Solutions lets you analyze relevant, up-to-date information from people, vehicles and assets to help drive insights, reduce operational costs and uncover new growth opportunities.

People, Vehicles, & Assets: Mobile and Connected by our Solutions

Mobile Voice Dispatch (PTT)
Transport Company

An express shipping company is expanding to neighboring states. It needs a more effective and scalable fleet management solution.

Benefits

- Track your vehicles and their cargo
- Customize reporting to ensure everyone on your team gets the data they need
- Proactively manage vehicle maintenance

Use Mobile Voice Dispatch (PTT) to communicate with mobile workers and drivers*

Eliminate time-consuming logs and meet compliance regulations

**Automate driver log books to avoid fines**

With one look at the screen, a driver can determine if their on-duty time falls within FMCSA Hours of Service guidelines.

**Hours of Service (HOS) compliance**

Maritime eliminates paper logs to help meet government regulations through automatic monitoring of driver hours at the wheel, i.e., Hours of Service (HOS).

**Painless roadside inspections**

Drivers can easily provide roadside inspectors with the DOT Log information they require while ensuring that their own privacy and personal information is protected.

**Always audit ready**

In the event of an audit, all electronic logs and driver information are easily accessible to any transportation authority. The company minimizes the risk of hefty fines and other penalties.

Rural Child Welfare Services

A team of social workers provides services to a large rural catchment. It needs a cost-effective, cloud-based solution to effectively manage its team of mobile case workers.

Benefits

- Gather and submit service data in near real time via mobile devices in the field
- Make real-time decisions about your mobile operations

Send job details quickly and easily

Dispatch can send case information to its mobile workers, track progress and manage workloads all in near real-time. Integrated Mobile Voice Dispatch (PTT) allows for immediate follow-up, if necessary.

On-the-go time clock

Case workers can clock in and out from the field using their mobile device, as well as record breaks and lunches.

Deploy wireless forms

Enhance forms with features such as photo capture, calculations, and e-mails for instant digital receipts.

Event-based tracking

A web dashboard displays the latest status updates from employees along with their last locations, providing visibility of their work progress as completed.

Use Mobile Voice Dispatch (PTT) to communicate with mobile workers and drivers*

MOBILIZING YOUR WORLD

Back
Dispatch and track to optimize customer service

**Improve service with smarter dispatch**

The company can pick the closest available worker for the next job and send the job details to their smartphone or immediately communicate via integrated Mobile Voice Dispatch (PTT).

**Simplify messaging from the field**

Technicians can use any smart device to send and receive information in the field to help increase their productivity.

**Notify when your workers will arrive**

Dispatch can use ETA data to communicate arrival time to customers on the route.

**Lower risks and costs**

The company monitors driver behavior to provide teaching moments while reducing fuel and maintenance costs.

**Use Mobile Voice Dispatch (PTT) to communicate with mobile workers and drivers**

City Parks Maintenance

The city has a large network of green spaces, pathways, and parks that require landscape maintenance. It needs a tool that enables its crews to complete and submit forms from nearly anywhere, anytime.

Benefits
- Create, dispatch, and manage custom forms to the field
- Save, analyze, and generate reports based on data collected that can be automatically emailed to stakeholders

Facilitate consistent field reporting

Allan Park
Tree Report
6 Oak Trees
2 with sign of Oak Wilt
Will need to remove

The department can replace paper forms with mobile versions that increase the completeness and accuracy of the information collected.

Easily share information

Parks Maintenance can easily send and share any collected data with other departments, to increase collaboration and efficiency.

Create and distribute forms

The city can create and dispatch work orders via the web portal, for completion in the field, to help maximize worker productivity.

Leverage and analyze collected data

All departments can mine their data, using add-on analytics, to uncover patterns and correlations that help identify and address critical issues.

Safeguard trailers and their contents

**Always know where your trailers are**

The company can maximize the utilization of its trailers and easily identify their location and availability.

**Help prevent theft and reduce operating costs**

Trailers are tracked in near real-time and unauthorized movements are automatically detected including door open and close event alerts.

**Help prevent content spoilage**

Trailer temperatures are continuously recorded. Alerts are triggered automatically when specified limits are exceeded so the company can take appropriate action.

**Comply with food transportation regulations**

The company uses accurate, historical temperature data to help ensure product quality and mitigate risk by providing recorded temperatures to clients after the fact.

---

**Shipping Co.**

Company fleet includes heated and refrigerated trailers to maintain cargo quality as it travels. It needs a mobile monitoring solution so it can track its trailers wherever and whenever.

**Benefits**

- Know exactly where trailers are located
- Add an optional temperature monitoring solution that can monitor the temperature of shipments

**Company fleet includes heated and refrigerated trailers to maintain cargo quality as it travels. It needs a mobile monitoring solution so it can track its trailers wherever and whenever.**

**Trailer & Contents Monitoring**

- **Capacity:** 10ft
- **Contents:** Frozen Vegetables
- **Location:** 123 Main Cargo Bay

**6:05pm**

- **Trailer A**
  - Location: 123 Main Cargo Bay
  - Contents: Frozen Vegetables

**7:00am**

- **Trailer B**
  - Location: 7 River Way
  - Contents: Frozen Vegetables
  - **Temperature Alert!**
    - 42°: Threshold exceeded

**7:00am**

- **Trailer C**
  - Location: 7 River Way
  - **Warning: Door Ajar!**
Safeguard your high value assets

**Equipment Rental Company**
The company needs to effectively monitor, allocate and maintain its $100 million fleet of construction equipment across a large number of job sites.

**Benefits**
- Know exactly where your assets are located
- Verify that assets are being used to their fullest extent
- Help ensure assets don’t get stolen or lost

**Jobsite Asset Monitoring**

**Always know where your assets are**
The company can manage all of its assets from one location.

**Help prevent unauthorized use of assets**
Additional sensor readings can be instantly alerted in cases of unauthorized activity, such as open doors, fuel theft, usage of power take-off equipment.

**Improve asset utilization and productivity**
Management can easily generate reports to assess and manage fuel, maintenance, insurance and other costs.

**Reduce theft and improve asset recovery**
Receives near real time alerts based on GPS location activity when assets start in motion, enter or exit business-defined geo-fenced areas or stop for long durations.
