

AT&T Consulting Fast-Start

Lean on our experts and resources to accelerate and de-risk your transformation initiatives and drive successful outcomes

Features

- Dedicated architect, project or program manager
- One month of consulting time (one month = 20 contiguous workdays, totaling 160 hours)
- Flat rate per resource with an option to renew monthly

Benefits

- **Acceleration:** Our experts can quickly integrate with your team to accelerate the process
- **De-Risk:** Our expertise in managing complex, multi-vendor global deployments helps you avoid common pitfalls
- **Diverse expertise:** Our rich, diverse talent pool is skilled across multiple disciplines, vendors, and platforms
- **Customer value:** We can take ownership of tasks when you have limited time or resources

Our experts help you navigate the complexities of modernization and transformation initiatives to ensure rapid, seamless adoption of next-generation technologies.

When you're ready to transform your business and find ways to remain competitive in a fast-churning market, you must ensure that your team and infrastructure are ready as well. The AT&T Consulting Fast-Start program offers a flexible support model to help speed up your transformation journey.

In order to deliver the best business outcomes, organizations must navigate complex technological changes. If you find that your staff lacks the expertise or has limited access to the resources needed to support these changes, AT&T Consulting Fast-Start can help.

Jump-start your journey to success

Many customers are realizing that transformation initiatives are commonly focused on emerging technologies that require significant uplifts to new technologies, vendors, and platforms. Often, internal expertise is lacking within the current technical staff. This leads to delays in decision making around best fit solutions and missteps in design and migration approaches.

AT&T Consulting Fast-Start gives you access to experienced experts who use what they've learned to help with planning, designing, and setting up your projects. They use helpful templates, tools, and methods to make your network, voice, and mobility upgrades. With their expertise, this program helps you identify and resolve issues in critical areas throughout your organization.

Assessment, discovery, and planning

- “Pre-deployment” services help quickly evaluate your current infrastructure and facilitate informed decisions by applying robust design principles.
- Analyzing your current IT environment and identifying potential weaknesses means AT&T Consulting Fast-Start can outline effective deployment strategies. This includes developing a strategic transformation plan and aligning solutions to your unique business needs.

Speedy implementation

- Personalized hands-on assistance during the implementation and deployment phases helps create a smooth transition to the new target technology or managed service.
- With a plan in place and vulnerabilities identified, AT&T Consulting Fast-Start provides direct expert support. Because our experts are involved early, they can minimize obstacles early and ensure systems are efficient and scalable. They are ready to take on key projects and workstreams, de-risk transition from current systems, and implement the best practices that work for global transformation at scale.

The value of professional expertise

With AT&T Consulting Fast-Start, you'll collaborate with a dedicated architect, project manager, or program manager. These dedicated professionals provide a month of consulting time, with the option to renew their services monthly.

AT&T Consulting Fast-Start professionals know how to integrate with your current team. These strategic

partners can help you avoid common obstacles in your transformation, lessening your deployment risk. Our experts are skilled across multiple vendors and platforms to meet your varied project needs and can “reach back” to a broader network of AT&T Consulting experts to further speed deployments.

Our experts can provide one-on-one attention across these typical transformation projects:

- SD-WAN transformation
- Secure Access Service Edge (SASE) transformation
- Secure hybrid cloud adoption
- Legacy copper/Time Division Multiplexing (TDM) to cloud
- Wireless Campus LAN (5G and Wi-Fi) modernization
- E911 and NG911
- Contact center cloud transformation
- Voice transformation
(Microsoft Teams, Cisco Webex, Zoom, etc.)
- Unified Communications as a Service (uCaaS) mobile
- Mobility governance and transformation
- Program/project management

Do you have the expertise, resources, and experience to ensure the success of your digital transformation project? If not, we can help. Contact AT&T Consulting and Professional Services to accelerate your transformation project and reduce the risks along the way.

Partner with AT&T Consulting Fast-Start to speed your business transformation.
