AT&T Business is having ongoing conversations with leading transportation companies. These are the top technology priorities we’re hearing from many of them as they seek to stay connected, communicate and collaborate, and protect and manage data.

10 Transportation priorities for COVID-19 and beyond

Staying connected for business continuity

Remote workers and operations centers

- **FirstNet®**: Priority access for first responders and key personnel that support them to the FirstNet dedicated network and communications tools for public safety
- **Contact center solutions**: Responsive communication channels to help improve the omnichannel customer experience and streamline remote operations and supply chains
- **Remote network access**: Extend a highly secure network to virtually any location or wired or wireless device to help enable remote teams to access data and track shipments
- **Scalable collaboration tools**: Flexible infrastructure that can help minimize strain on corporate and cloud resources for highly secure meetings, instant messaging, and file sharing
- **Fiber to the home**: Extend a highly secure network to virtually any location or wired or wireless device to help enable remote teams to access data and track shipments

Connected fleet, assets, and locations

- **Highly secure agility**: Help decrease fleet downtime with automated updates for cybersecurity, dispatch continuity, and scalable network access to critical applications for frontline workers
- **Asset tracking**: Centralized interface that can track, monitor, and manage assets, and utilization to help increase protection, productivity, and revenue
- **Fleet management**: Rapid deployment solutions that can help keep shipments moving with mobile hotspots, Enhanced Push-to-Talk (EPTT), and Land Mobile Radio (LMR)
- **Home-based training**: Augmented and virtual reality apps that can deliver essential training at home via 5G for increased efficiency, compliance, and reduced risk
- **Fraud and data protection**: Device-agnostic, integrated cybersecurity that can help protect remote workers from threats as they access cloud and on-premises apps
