As your business plans for the upcoming 2G/3G network sunsets, you can rely on AT&T to help you migrate.

We have the experience, devices, and professional services to provide your business with a successful, future-ready upgrade to 4G LTE and (when available) 5G.

As of 1Q20, there are 69M devices on the AT&T network as of 1Q20.

New technologies offer better performance — 4G LTE/5G can help provide:

• Improved Internet of Things (IoT) applications
• Better user experiences
• Improved business operations
• Increased efficiencies

What customers need to consider in IoT migration:

• An experienced, full-service provider with gold-standard expertise in IoT
• Global coverage availability
• Consolidation of multiple carriers and logins
• Go-to-market strategy that is future-ready
• Network-based security
• Quality and flexibility of 5G coverage
• Managing cost of IoT implementation
• A modernized mobile infrastructure

It starts with a thorough audit: help us understand how your existing devices are being used. We can help you identify carrier network sunset dates and plan ahead.

Planning your migration strategy and use case mapping: We will help you assess requirements, resources, timing, risks, and opportunities.

Putting the right technology in place: We provide virtually seamless integration of technology across endpoints, connectivity, data in the cloud, and cybersecurity to help you maintain business operations during and after migration.

Aligning with us streamlines your migration journey: We are the leading IoT service provider in the U.S. with more than 69 million connected devices on the AT&T network as of 1Q20.

Why do more companies choose AT&T? Our customers benefit from a wide range of expertise:

• Highly secure, highly reliable global network
• The AT&T Foundry innovation centers
• AT&T Certification Lab
• Leading-edge platforms
• The AT&T Control Center with global connectivity
• Award-winning, 24/7 customer service
• Flexible, powerful solutions

AT&T can help with your migration success
