Why AT&T is the right choice for companies upgrading 2G/3G IoT devices

The trusted consultant to help you plan for network sunset

The 2G/3G network sunsets in the U.S. are rapidly approaching. 2G/3G enabled devices will soon become obsolete and unusable, and replacing them can be intimidating. To avoid business disruption, companies must plan for network sunset and map out transitions to 4G LTE now and be future-ready for 5G technology. AT&T has the industry experience and insights, devices and professional services support to help ensure a successful upgrade.
