Data-only, enterprise-grade cellular plans designed to keep businesses connected to critical applications for a variety of use cases.

- **Failover connection** – AT&T Wireless Broadband can also be a backup solution that gives you access to the wireless network during a high-speed internet service outage.
- **Cost-effective alternative** – Many small businesses find AT&T Wireless Broadband a cost-effective and timely alternative high-speed internet in areas where it is unavailable.
- **Remote pop-up connectivity** – Need to set up a new location rapidly or support a temporary outlet at an event? AT&T Wireless Broadband service can be used as a quick, highly secure connection to business resources while in the field.

Supported by a network you can trust. Tools to run point-of-sale processes, scheduling, customer engagement, and more.

- **Mobile point-of-sale (POS)** – Streamline check-out and purchase with tablets. They help your employees process on-the-go transactions more quickly, enabling self-checkout options for your customers.
- **Virtual repair support** – Tablets can provide full breadth of your inventory to customers via tablets. Employees can also keep tabs on availability, inventory, and order status.
- **Customer engagement/communication** – Tablets allow front-line workers to remotely connect to business resources while in the field.

A portfolio of devices, from monitors and theft mitigation sensors to GPS and analytical tools, to help your business move forward.

- **Follower connection** – AT&T Wireless Broadband can also be a backup solution that gives you access to the wireless network during a high-speed internet service outage.
- **Cost-effective alternative** – Many small businesses find AT&T Wireless Broadband a cost-effective and timely alternative high-speed internet in areas where it is unavailable.

How small businesses use AT&T mobile solutions

From rugged, field-purpose devices with push-to-talk to the sleekest smartphones and tablets that support the latest application and connectivity.

- **More than just a phone** – Access your business resources (aleveland employee portals, sales tools) from anywhere your business takes you.
- **AT&T AccessoryLink** – A network-based service that helps you manage visibility, productivity, and security for SIM-based devices, giving powerful management tools and protection.
- **Scalable purchase options, business data rate plans and device protection** – Whether you’re a small business or a large enterprise, get access to a variety of simple, flexible, and scalable plans and affordable business data plans to fit your needs.
