

Help protect workers and valuable property with AT&T Staff Alert

Hospitality workers face unique security challenges

9 out of 10

hospitality workers have experienced sexual harassment¹

96%

of hotel staff indicated that they would feel safer with a panic button²

A wireless alert button can help

AT&T Staff Alert is an Internet of Things (IoT) solution providing workers an easy-to-use security device. It operates as a personal panic button for use in emergencies to summon help to rooms and common areas.

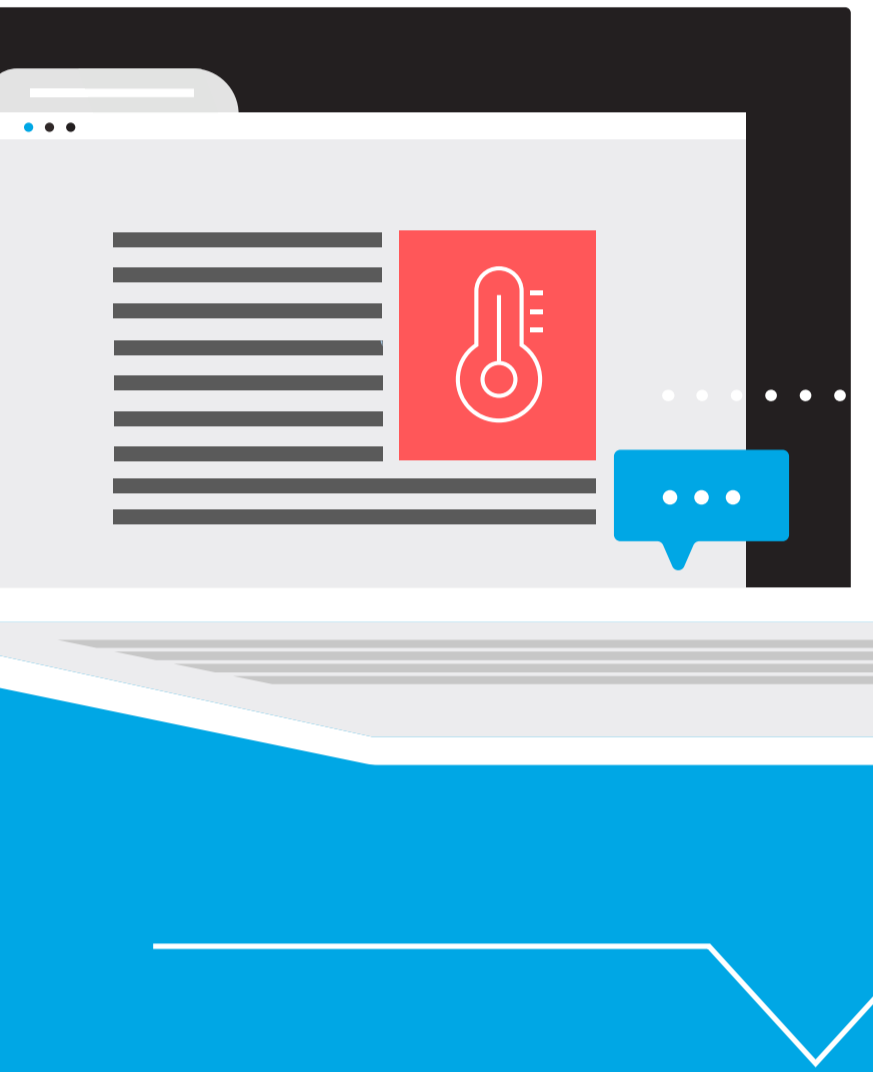

Mobile and precise

- Beacons use a combination of Bluetooth and ultrasound technology to pinpoint alert locations
- Uses reliable AT&T LTE network and does not depend on Wi-Fi

Convenient and easy to use

- Intuitive, web-based portal for alert and device management
- Devices developed with hotel staff for comfortable design and reducing false alarms
- Hardware design conserves the electrical outlet so that it is still available for guests and staff

AT&T Staff Alert architecture delivers a comprehensive alert solution.

1

Alert buttons: Lightweight, portable, and battery operated

2

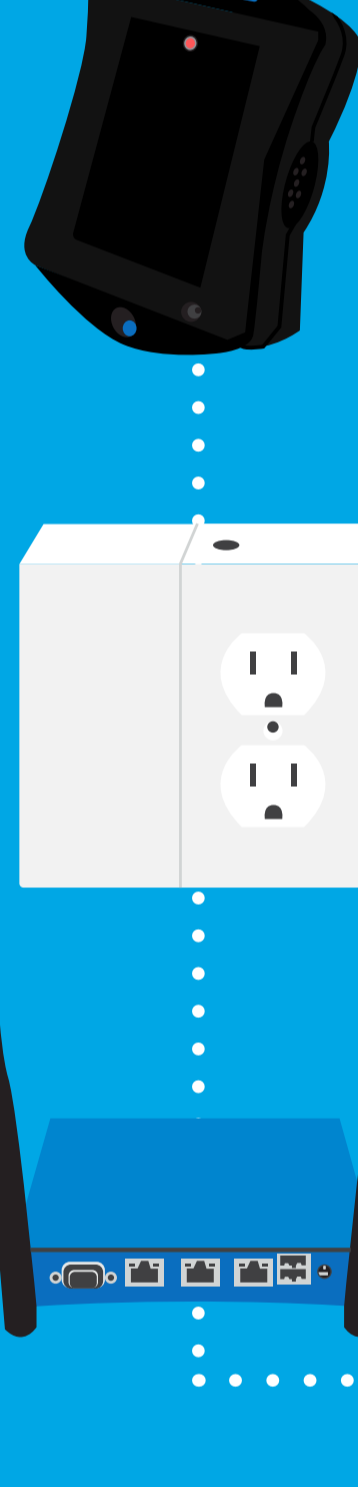

Location beacons: Plug-in or battery-powered devices in all areas of coverage, designed to conserve outlets

3

Access point: Transmits the location of alert with respect to the closest location beacon

4

Gateway: Uses reliable AT&T LTE network to push data to the cloud and send alerts

AT&T Staff Alert works in hotel rooms and beyond

In addition to keeping your staff secure, it can also assist with monitoring the following:

Hotel equipment tracking

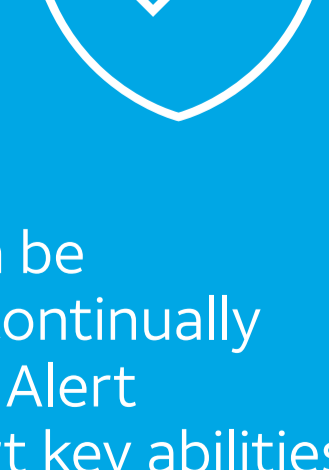

- Crib and rollaway bed location
- Room service tray
- Luggage carts
- Cleaning carts
- Kitchen equipment

Building management

- Safety alerts
- Building energy monitoring
- Lighting
- AC control based on room activity
- Weather monitors
- Air quality

Help keep hotel staff and valuable assets safe

Choosing the right IoT solutions can be challenging. Evolving technologies continually redefine the digital landscape. Staff Alert creates an IoT foundation to support key abilities, all while helping keep staff safe. It's the power of IoT possibility.
