Cyberattacks are a growing threat for small businesses and the U.S. economy, according to the U.S. Small Business Administration. In 2019 alone, the cost of cybercrimes reached $3.5 billion.

While it’s true that cybercriminals lurk in the shadows, waiting for a chance to break into your network to steal sensitive data or intellectual property — or just to wreak havoc — cybercriminals don’t have to win.

AT&T VPN enables highly secure network connections without needing additional software, encryption, or tunneling. MPLS Virtual Private Networks (VPNs) can help protect your network from bad actors.

What you’ll get

- Single MPLS VPN Network
- Support for Multiple VPNS
- Virtual Local Area Network (VLAN) on shared Ethernet access
- Monitoring and Management
- Applications that are important to you

AT&T VPN can protect you from:

- Distributed Denial of Service (DDoS) attacks
- Spoofing
- Unauthorized intrusion
- Downtime and lost revenue due to a cyberattack

Get the connection that helps shield your sensitive traffic from hackers and cybercriminals.
