

## Mobilize your workers

## Improve your business performance

## AccessMyLAN™ supports employee productivity

- Employee smartphones and tablet devices become productivity tools when connected to AccessMyLAN™
- Effectively manage your mobile data with better control over who has access to what websites and apps.
- Improves employee productivity with data policies that help block time wasting websites and apps.

## Mobile data usage is growing<sup>1</sup>

**“ 75% lack real-time visibility of mobile usage. Nearly 90% saw overages in the past one year.”**

**“ Mobile data grew by 44% in 2016. ”**

**“ By 2020, 30% of IT mobile and endpoint resources will be dedicated to enabling frontline workers. ”**

**“ In North America, traffic per smartphone is expected to increase from 7.1GB per month at the end of 2017 to 48GB by the end of 2023<sup>3</sup>. ”**

## Remote workers face security challenges

THERE WAS A 54% INCREASE IN MOBILE MALWARE VARIANTS IN 2017<sup>4</sup>

**“ Nearly 86% of U.S. organizations will increase their spending on security in 2018.<sup>5</sup> ”**

MOBILE MALWARE | PHISHING ATTACKS | BOTS | MALWARE | RANSOMWARE | SPYWARE

## AccessMyLAN™ controls

**PROTECT** company data on the mobile network. AccessMyLAN™ helps block access to the 3.4 billion malicious requests that happen monthly.

**DETECT** suspicious malicious behavior on the device, app and network. AccessMyLAN™ provides observations and actionable insights.

**RESPOND** to mobile threats. AccessMyLAN™ helps ensure the business has the means to respond to malicious attacks, and stolen devices.

AccessMyLAN™ helps protect, detect and respond to mobile threats

## Why should your company care?

### FINANCIAL COST

60% of small businesses were unable to sustain operations six months after a cyber breach

### REPUTATIONAL RISK

Loss of data not only has potential legal consequences, but also practical damage to reputation (e.g. being "named and shamed")

## Security professionals are concerned<sup>6</sup>

Doubtful their organizations can prevent a mobile cyberattack

Companies fail to adequately secure mobile devices

Expect the frequency of mobile attacks to increase

Increase in the number of apps downloaded in the last year

## Safety checklist

SMART PHONES, TABLETS ARE **EASY TARGETS FOR CYBER-ATTACKS. STAY SAFE!**

- 1. Password protect all devices and data
- 2. Locate misplaced devices remotely
- 3. Lock down all data on lost or stolen devices
- 4. Wipe devices automatically if unrecovered
- 5. Block malicious attacks before they happen
- 6. Comply with regulatory, company & HR policies
- 7. Control app and website usage
- 8. Provide insights on inappropriate usage
- 9. Respond to the observed threats
- 10. Protect traffic on cellular and wi-fi
