Update customers with caregiver locations  
Promote safety for home care providers with near real-time monitoring

**Manufacturing**  
Maintain accurate inventory records  
Staff efficiently using PTO tracking  
Prioritize orders based on urgency

## MANAGEMENT MADE EASY

Benefit from a suite of practical tools that increases efficiency and connects you with workers and assets like never before. These robust features combine to form a single solution designed to help your business become a modern, productive workforce, no matter the industry.

Wireless forms

Build and generate forms that are easy to deploy

Dispatching

Streamline daily tasks and improve customer service

Integrated EPTT

Conduct group or individual calls within the application, with the addition of EPTT

Timekeeping

Employees can clock in and out from the field

Intelligent tracking

GPS tracking gives a clear view of employees' locations

### Redefine group communication

Preconfigure group calls of up to 250 AT&T EPTT users, so your urgent messages are relayed faster.

### Communicate without delay

Break into an active individual or group call to relay any pressing messages instantly.

### Reimagine remote monitoring

Know exactly where staff is with individual location sharing, group tracking, and supervisory geofencing.

### Dispatch with ease

Send new job assignments to technicians direct from the worker tracking screen.

Take everyday communication with employees to the next level with Enhanced Push-to-Talk (EPTT). You can make calls from within the application directly to any EPTT device or group on your AT&T account.

**Increase productivity**  
Immediate access to timesheets, orders, and forms

Enhanced communication with integrated EPTT

**Revenue generation**  
Service customers efficiently with proximity-based job dispatching

Simplify tasks so you can take on more work

**Expense reduction**  
Fewer errors due to illegible forms

**Security/safety**  
Use alerts to monitor asset movement
