

AT&T Private Cellular Networks - Events

A temporary 5G+ solution

Bring 5G+ (mmWave) to your location and take your business to the next level with **AT&T Private Cellular Networks – Events**. A rapidly-deployed, dedicated 5G+ network for businesses and venues who want a temporary, enterprise-grade solution to enable 5G+ experiences.

Interim 5G+ solutions

Planning a 5G solution but you're not quite ready? Get connected now to start innovating with 5G+

Rapid 5G+ deployment

Turn-key solution includes: site design, installation, software, hardware, and on-site professional services.

Closed and dedicated

Your private network runs on dedicated 5G+ network to meet your bandwidth and performance needs.

Sports and entertainment

Enrich fan experiences and enhance broadcasting coverage with a portable network that supports 5G+ devices and technology. Bring exciting, immersive interactivity to your venue.

Transforming broadcasting and media coverage

Wireless video cameras allow broadcasters to get into the action and cover even more angles without cords.

Game-changing experiences

Combining live-streaming video, mixed reality, and near-real-timestats can reinvent how fans connect to experiences.

Immersive experiences

Offer your patrons exciting experiences beyond their imaginations.

Gaming events

Give fans the opportunity to be part of the game by supporting Augmented Reality (AR) applications and gaming.

Enrich fan experiences with 3D-rendered avatars.

Hologram AR communications

Supports AR/Virtual Reality (VR) applications that demand reliable low latency with dedicated and private network designs.

Portable & temporary

Flexible onsite 5G+ design

Closed & Dedicated network

Turn-key solution
