5. Visibility & Control

Network and Application Security

Mobility

Unified Communications and Collaboration

Frost & Sullivan SD-WAN survey results indicate:

54% of IT decision makers indicated they prefer a fully managed SD-WAN service.1

SD-WAN OTT on AT&T FlexWare

AT&T offers a variety of SD-WAN solutions:

1. Over the top model
   • Deploy over an SD-WAN appliance or as a VNF on AT&T Universal FlexWare Device.
   • Transport agnostic - create an overlay network over any public (broadband, DIA, 4G) or private network (MPLS VPN, Ethernet).

2. Network-based model
   • Utilizes the AT&T FlexWare Device—a universal CPE that can run multiple virtual network functions (VNFs) including VeloCloud SD-WAN VNF.
   • The Software-Defined Networking enabled AT&T Integrated Cloud nodes ensure that the gateway bandwidth is automatically adjusted if site bandwidth changes.
   • Easily mix and match SD-WAN and non-SD-WAN sites.
   • Available in 200+ countries and territories.2
