

What type of internet connection is right for my business?

Understand the options.
Make informed decisions.
Move your business forward.

Today's businesses need connectivity options that enable them to take advantage of rapid advancements in technology.

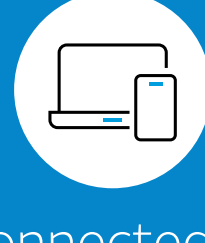

Leaders and IT teams need speed and agility to deploy custom solutions where they're needed, bandwidth for rich experiences, and the flexibility to modify these systems as their business changes.

What are you envisioning for the future of your business?

A workforce that can more easily use more applications while working from anywhere

More connected devices that help you monitor operations and work more efficiently

Moving from data center dependency to easier, more flexible cloud-based networking

More digital experience with on-demand content for customers to learn about, purchase, and use your products and services

Gartner predicts that "by 2026, 25% of people will spend at least one hour a day in the metaverse for work, shopping, education, social and/or entertainment..."

Garner Press Release. Gartner Predicts 25% of People Will Spend At Least One Hour Per Day in the Metaverse by 2026

Where do you start?

1 Think about your business Internet needs

Understand its role in your business

Determine your speed and bandwidth requirements

Consider your future needs

2 Know your options

Broadband can be delivered over fiber optic cable, wirelessly using Wi-Fi, or a combination the two.

AT&T Dedicated Internet
Dedicated broadband that's not shared as a public network.

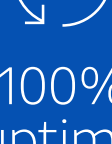

Not shared

Ultra-fast speeds, up to 1 Tbps

Large bandwidth

100% uptime

Symmetric upload /downloads

Option to manage your router

GOOD FOR: Streaming, conferencing, large retail advanced manufacturing, Internet of Things (IoT), artificial and virtual reality training

AT&T Business Fiber
Faster speeds and more bandwidth than cable

Shared connection

Ultra-fast speeds up to 5G

Large bandwidth

Symmetric upload /downloads

GOOD FOR: conferencing, file transfers, adding voice over internet, retail, and cloud applications

3 Evaluate providers

AT&T Business provides industry-leading connectivity options.
