

AT&T Consulting for Secure Access Service Edge (SASE)

AT&T Consulting & Professional Services can help unify your network and secure connectivity solutions into a single, cloud-delivered service, providing seamless edge-to-edge protection for both remote users and data centers.

Benefits

- Work with experts to develop a strategy and roadmap that addresses planning and budgeting required to realize a SASE deployment
- Uncover functional and technological gaps in network and security—determine readiness
- Reduce risk and stay ahead of the threat landscape
- Address the complexity of implementing policy driven, software-defined secure access
- Streamline network complexity
- Promote cost savings

Applications, users, and devices are moving beyond the traditional corporate zone of control, dissolving the once trusted perimeter.

Defend your data with SASE. Let us help.

Data spreads. It flows across multiple locations, cloud vendors, and a variety of endpoint devices. This has made traditional security that relies on protecting organizations from the perimeter insufficient. An organization's network architecture should now embrace a Secure Access Service Edge (SASE) model to protect direct-to-cloud access while maintaining required connections to the data center.

What is SASE? It's a cloud-based model, blending network security with software-defined wide-area networking (SD-WAN). For your users, it means they gain secure access to applications and resources. It doesn't matter where the users or the resources are located. For your network, it means security and flexibility. And for you it means greater peace of mind and agility. AT&T Consulting and Professional Services can help you on your SASE journey, from workshop to roadmap to deployment.

SASE Readiness Workshop

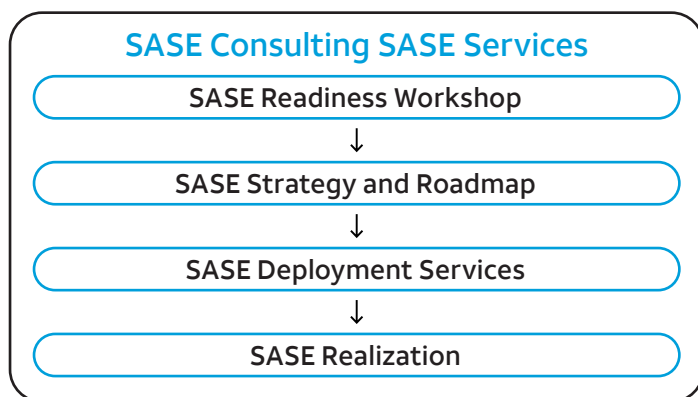

As you begin your journey with SASE, it is important to gain a full understanding of what lies ahead. AT&T Consulting and Professional Services' SASE Readiness Workshop is a five-segment course. In it, you review your current maturity and data requirements, risks, goals and objectives, understand access requirements, and provide a go-forward plan for future stages along the journey.

SASE Strategy and Roadmap

The next step is to define your technology vision for moving to a SASE environment. Strategic planning should focus on aligning industry-best practices and best-of-breed architectural approaches with SASE technologies. These technologies are built to deliver diverse, highly secure connectivity and robust performance for mission-critical application services. Using a prescriptive delivery methodology, we will provide you with a technology roadmap aligned with your goals for budget and transformation.

SASE Deployment Services

Having a complete vision, strategy and roadmap to SASE in place, the next stage is execution. We offer proven experience in design, engineering, and deployment services. And we deliver detailed project and program management, bringing the vision and roadmap to life.

Topics covered in Workshop and Strategy and Roadmap sessions:

Cloud-ready WAN
SD-WAN

Secure network access
Cloud Access Security Broker (CASB), Secure Web Gateway (SWG), Firewall-as-a-Service (FWaaS), and zero trust network access (ZTNA)

Data security
Encryption, decryption, data loss prevention (DLP)

Identity and access
Identity management, authorization, authentication

Analytics
Security/network ops, single pane of glass

Use cases
End user connectivity and security profiling

Why AT&T Consulting and Professional Services

Since 1999, AT&T Consulting and Professional Services has delivered world-class expertise in secure networking, cloud, voice, mobility, and IoT solutions across the full lifecycle—from advisory and deployment to premier support services. Our seasoned professionals bring unique and diverse experiences, combining industry insights with proven best practices. This means we can help you harness innovation, overcome barriers to technology adoption, and accelerate your business outcomes in the most cost-effective way. With AT&T Consulting and Professional Services, you gain a trusted partner dedicated to taking your business to new heights.

Ready to take your business to the next level? Contact us at CPS@att.com to discover how AT&T Consulting and Professional Services can help.
