

How do I multi-cloud?

AT&T Consulting and Professional Services can help you realize your vision for, and transformation to, multi-cloud connectivity

Features

- Multi-cloud connectivity consulting to define your strategy, roadmap, and technology needs
- Multi-cloud connectivity professional services to realize your vision and transformation
- Access to AT&T product and service delivery teams

Benefits

- Proven, holistic approach based on years of cloud connectivity experience
- Advanced expertise to optimize your transformation
- Tools to speed and de-risk cloud connectivity design, testing, and deployment
- Fast Start program to accelerate your project planning

Connect securely and reliably to multiple clouds. We have the expertise to help you achieve your multi-cloud transformation journey.

Speed your multi-cloud business evolution

Multi-cloud connectivity offers many benefits. It can help you excel in areas like speed, performance, and innovation. However, overcoming the complex technology and decision-making necessary to successfully implement it is no small feat. You need a cross-functional team of experts with a proven track record in delivering fast, secure, and reliable multi-cloud connectivity.

AT&T Consulting and Professional Services has the tools, knowledge, and experience to accelerate your multi-cloud business evolution. We serve enterprises of all sizes and industries at all stages of their multi-cloud journey. This makes us uniquely qualified to find the right solution for you. Our services enable secure, fast, and reliable connectivity to the cloud, within the cloud, and between clouds.

Strategies to fit your enterprise

Most enterprises use multiple clouds, each with its own unique features and network setup. That's why even the most skilled IT teams rely on AT&T Consulting and Professional Services experts to get the most out of multi-cloud networking.

As your trusted multi-cloud advisor, we take the time to understand your goals, challenges, and ideas. This helps us create insights and strategies tailored just for you.

We take a big-picture approach to deliver strong, customized solutions that support your overall vision. By following proven steps and best practices from successful projects worldwide, we help you achieve great results.

Advice and planning

For technology advice and planning, our Consulting Advisory team works with you to create a strategy and vision. We help you make important choices about the technologies, designs, vendors, and platforms that fit your goals. We also offer thorough research so you can make smart, data-driven decisions about secure connections to your applications, no matter where they are hosted.

We serve nearly 2.5 million of the largest global companies, government agencies, and small businesses.

Design and deployment

Our professional services bring the skills needed to set up the technologies and solutions you choose. When it's time to act, our team works as part of your organization to handle the design, engineering, testing, deployment, and support needed to reach your goals. This includes planning migrations, testing, transforming systems, and managing governance.

Get a fast start

For companies ready to start their transformation quickly, we offer our Fast Start program. This program includes technical and project management experts who join your team to speed up the process and reduce risks along the way. They bring experience and knowledge to help jump-start key decisions and technical tasks using best practices, vendor choices, and multi-cloud tools and templates.

The benefit of AT&T global experience

Because we work with many types of organizations and situations, we're ready to help you and your specific use case. Along with the AT&T Business solutions we provide, our strong connections with vendors give you many great options as your needs grow. We have a large collection of resources like tools and templates that help reduce risks and speed up deployments. We also offer guides, reference designs, plans, and dashboards. Plus, you'll get support from our AT&T product, service, and technical teams for solutions that come from AT&T.

Connectivity and security

Connectivity and security are built into everything we do in the cloud. It's part of who we are. We provide the technology and tools you need to keep your data safe as it zooms from mobile users to people working from home to employees at job sites to multiple connected branch offices—and beyond.

As a top transport provider, we also guide you on protecting your network—whether through secure access service edge (SASE), software-defined wide area network (SD-WAN), or other solutions.

Why AT&T Consulting and Professional Services

Since 1999, AT&T Consulting and Professional Services has delivered world-class expertise in secure networking, cloud, voice, mobility, and IoT solutions across the full lifecycle—from advisory and deployment to premier support services. Our seasoned professionals bring unique and diverse experiences, combining industry insights with proven best practices. This means we can help you harness innovation, overcome barriers to technology adoption, and accelerate your business outcomes in the most cost-effective way. With AT&T Consulting and Professional Services, you gain a trusted partner dedicated to taking your business to new heights.
