

How to bulletproof your internet

Choose AT&T Dedicated Internet for **reliable connectivity** and AT&T Penetration Testing Service to learn how to **keep intruders out**.

Why bulletproof your internet?

Digital transformation. Businesses are moving sensitive data and critical business applications closer to end users to drive business efficiencies and adapt faster to market changes.

Cybercrime is skyrocketing. Cybercrime can result in financial, reputational, regulatory, or legal consequences. The FBI's Internet Crime Complaint Center received a record number of complaints in 2021, with reported losses exceeding **\$6.9 billion**.¹

You're vulnerable. Even those with a mature security posture, gaps are always possible. **90%** of cyberattacks are caused by some degree of human error.²

Compliance. Many businesses need to meet compliance minimums related to external and annual penetration testing.

Invest in dedicated internet

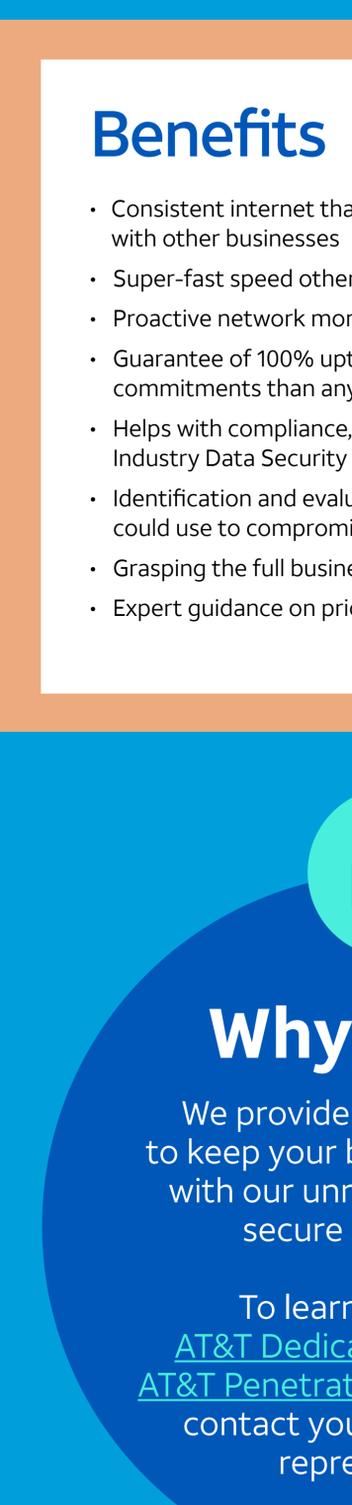

Your business needs access to valuable data and applications—without the burden of network congestion. Choose dedicated internet that's not shared with other businesses, and you'll get the exceptional performance needed.

We have **25+ years of experience** in cybersecurity consulting. Many organizations worldwide trust AT&T

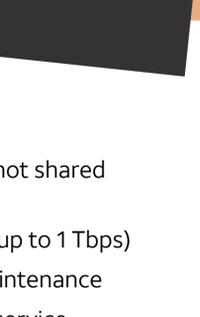

Identify cyber risks

Request penetration testing. That's where trustworthy security professionals try to breach your network.

You will get a detailed report of vulnerabilities and steps to correct them.
