

# Having the right data can increase the efficiency of your fleet and reduce operational costs

AT&T Fleet Management for Government helps optimize fleet routes, potentially reduces fuel costs, and provides notifications of needed maintenance.

As a government agency, you know what it's like to manage a fleet in the face of increasing costs and tighter budgets — all while following strict protocols for regulatory compliance and security.

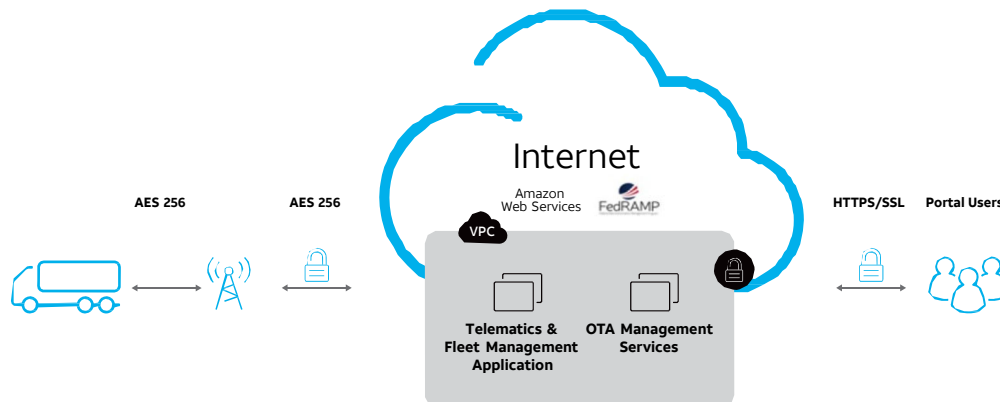

AT&T Fleet Management for Government enables you to manage your entire fleet on an easy-to-use platform providing near-real time data that helps control costs, optimize your fleet, and meet federal and state mandates.

## Key Features

- Highly secure end-to-end data transfer
- One universal device for all vehicles
- Active tracking for real-time location
- Performance and safety reporting
- Accident detection, notification, and reconstruction
- Fuel card integration

## Potential Benefits

- Reduces costs for fuel, labor, and maintenance
- Addresses security and compliance requirements
- Increases employee and fleet productivity
- Reduces fleet wide per-mile greenhouse gas
- Collects and manages data to support government-wide reporting systems
- Decreases fraudulent fuel card expense using location, odometer reading, and MPG discrepancies
- Improves public and fleet safety

The single platform portal, powered by Geotab, provides insight into your fleet’s routes, usage, maintenance, and driver behavior. You see all the actionable data in a single dashboard. From there, you can optimize daily routes, decrease idling, and improve driver performance. Proactive maintenance notifications can help you allocate fleet resources, such as sending the right mechanics and parts to the locations where they’re needed to minimize downtime. The platform uses engine diagnostics to compare actual performance versus expected performance and predict issues before they even become issues.

## Highly secure

AT&T Fleet Management for Government also provides end-to-end security that has been approved by the Department of Homeland Security. We use AES256 for Data in Transit (DIT), Data at Rest (DAR), and over-the-air signed firmware updates. As a result, the AT&T solution is FIPS 140-2 and hosted with a FedRAMP certified cloud provider. In addition, if you are one of the many agencies that have a private AT&T MPLS network, you can extend that connectivity to the cloud using AT&T NetBond®.

## Going forward green

Enable and accelerate your green strategy. AT&T Fleet Management for Government helps you follow state and federal mandates that require replacing current fossil fuel vehicles with Alternative Fuel Vehicles. Data from the current fleet usage and routes will also help you plan the placement of EV (electric vehicle) charging stations. Whether mandated or not, by rotating out inefficient gas vehicles with environmentally friendly electric vehicles, you can minimize the impact of unexpected fuel-cost surges on your budget.

## Important Information

**General:** AT&T Fleet Management for Government as described in this product brief (the “Solution”) is available only to eligible customers with a qualified AT&T agreement (“Qualified Agreement”). The Solution is subject to (a) the terms and conditions found at (a) <https://my.geotab.com/eula.html> (“Additional Product Terms”); (b) the Qualified Agreement; and (c) applicable Sales Information. For government customers, any Additional Product Terms not allowable under applicable law will not apply, and the Qualified Agreement will control in the event of any material conflict between the Qualified Agreement and the Additional Product Terms. Any service discounts, equipment discounts, and/or other discounts set forth in the Qualified Agreement do not apply to the Solution. The Solution may not be available for purchase in all sales channels or in all areas. Additional hardware, software, service and/or network connection may be required to access the Solution. The Solution is NOT eligible for any service discount, equipment discount, or other discount set forth in the Qualified Agreement.

Availability, security, speed, timeliness, accuracy and reliability of service are not guaranteed by AT&T.

**Professional Services:** Upon completion of any Professional Services, customer must either sign the acceptance document AT&T presents or provide within five (5) business days of the service completion date written notice to AT&T identifying any non-conforming Professional Services. If customer fails to provide such notice, customer is deemed to have accepted the Professional Services. Customer will in a timely manner allow AT&T access as reasonably required for the Professional Services to property and equipment that customer controls. Customer will ensure that the location(s) to which access is provided offer(s) a safe working environment, free of hazardous materials and reasonably suitable for the Professional Services. The Professional Services provided will be performed Monday through Friday, 9:00 a.m. to 5:00 p.m., local time. The mandatory software installation and configuration is estimated to take two days and must be completed within 45 days of order placement. If customer’s acts or omissions cause delay of installation and configuration beyond 45 days of order placement, AT&T will invoice customer for the installation and configuration charges after the 45th day. If the Professional Services provided in connection with the Solution are more complex than those described in this product brief, then a separate statement of work describing the activity and related terms and pricing will be executed. If impediments, complications or customer-requested changes in scope arise, the schedule, the Solution, and fees could be impacted.

Why  
AT&T

Long-term relationships with government agencies at all levels—and the ability to provide an array of highly secure technology solutions configured to meet diverse and unique needs on a global scale—give AT&T a powerful edge.
