

Critical communication & crisis orchestration made simple

Leveraging the power of the AT&T network, Everbridge enables rapid dissemination of critical information to targeted groups or entire populations, ensuring that everyone receives timely updates during emergencies.

Everbridge 360

When emergencies happen, organizations often struggle to notify the right people fast, align cross-functional response, and keep executives informed while maintaining business continuity. With **Everbridge 360**, your organization is equipped with stable, trusted software for multi-channel mass notification and employee safety with a dedicated workspace to coordinate responses, all delivered over **AT&T's ultra-reliable wireless network**.

Everbridge 360 is a comprehensive critical communications and mobile safety suite that enables rapid, reliable dissemination of critical information to targeted groups or entire populations. With real-time location awareness, multi-modal channel support, geofencing support, and more, Everbridge 360 gives your organization a rock-solid starting point for critical comms and crisis orchestration.

Who is it for?

- Security, Safety & BCM leaders (corporate security, business continuity/disaster recovery)
- IT Ops & Facilities (incident response, outage comms, service restoration)
- HR/People leaders (duty of care for mobile/remote employees)

Key features

Near real-time location awareness

Accurately track employees, contractors, and visitors with synchronized geolocation data.

Streamlined incident management

Ensure your organization can respond swiftly with tools for incident templates, scheduling, and automatic escalation.

Mobile safety features

SOS alerts, safe corridor, custom safety buttons and emergency call features help increase employee safety, even when on the go.

Elevated by AT&T

Built for IoT at scale. AT&T's IoT portfolio spans connectivity, device certification, and management platforms, so organizations can easily connect, monitor, and manage fleets of connected devices at scale.

A trusted network for critical communications. AT&T's nationwide network provides enterprise-grade LTE/5G connectivity and IoT services designed to keep devices online when it matters most.

What's included?

Mass Notification

Send messages to your entire organization securely in seconds with one-page notification creation and one-click sending.

Safety Connection

Track employee locations, provide virtual security escort services, and check incident management statuses in real time.

Crisis Management platform

Maintain command and control during a crisis, reduce liability and the cost of downtime, and accelerate time to restoration with single source of truth for all stakeholders.

Add-on hardware

VOS Panic Button

When every second counts, this discreet button sends an immediate alert to incident managers, which helps enable effective emergency communication and helping to improve incident outcomes.

Build a solid foundation for your organization's critical response teams.

Important Information

General: The Solution described in this product brief ("Solution") consists of Everbridge, Inc.'s critical event management software, VOS compatible equipment such as personal safety devices, and AT&T wireless connectivity services. The Solution is available only to eligible customers with a qualified AT&T agreement ("Qualified Agreement") and is subject to: (a) the Qualified Agreement; (b) applicable Sales Information; and (c) the terms and conditions of Everbridge, Inc., (such as software or service license) which will include express customer consent for location tracking any devices linked to specific individuals. All customer data collected by Everbridge, Inc. under such agreement will be managed according to Everbridge, Inc.'s policies. Discounts in the Qualified Agreement do not apply to this Solution unless specifically stated.

AT&T's responsibility is limited to the provision of wireless connectivity. The software and equipment are provided subject to the terms, conditions, and warranties of their respective providers. Additional hardware, software, services, or network connectivity may be required.

Availability, accessibility, security, delivery, speed, timeliness, accuracy, and reliability of the Solution are not guaranteed by AT&T, except as specifically set forth for AT&T connectivity services. AT&T's privacy policy is available at www.att.com/privacy. Additional terms from AT&T and Everbridge may apply. Offer subject to change. Please contact your AT&T Account Representative for details.

Coverage: The Solution operates within the domestic United States. Wireless data coverage is not available in all areas. Coverage maps are available at att.com/maps/wireless-coverage. Wireless data coverage is subject to transmission limitations, terrain, system capacity, and other factors.
