

## AT&T Mobile Select– Pooled Plans can help you tame overages, wrangle wasteful under usage, and stay connected and productive.

Help control your data costs and user experience with **AT&T Mobile Select<sup>SM</sup> – Pooled Plans**. AT&T Mobile Select – Pooled Plans can help simplify mobility for business customers by providing flexible pooled data for eligible devices.

### The power of the data pool

**Pooled data**<sup>1</sup> can help you deal with unused data and overages across teams with different data demands under a single billing account. For example, an insurance company may have adjusters in the field who consume vast amounts of data each month. The same company may have a home office where the staff uses much less data each month.

By having all of these users in the same data pool, the surplus data from the light users can help offset the overage charges of the data-heavy users.<sup>1</sup> What's more, the data pool is flexible so you can customize it to fit your organization. You can have a mix of pooled plans for different devices with different data allotments, all within the same data pool.

- Users with Mobile Select - Pooled plans are added to the data pool
- Users deplete their own data allowances first and then incur overage charges at the specified rate
- If the data pool's total under usage exceeds the total over usage at month's end, the excess under usage is reallocated to help offset the overage charges
- As users come and go, the data pool goes up and down depending on individual contribution!

<sup>1</sup> Data pool consists of CRU lines on Mobile Select – Pooled plans within a single billing account.

## Step into the 5G world

**5G technology** will alter the DNA of the digital experience. It's starting to already. And AT&T Mobile Select – Pooled Plans include access to AT&T 5G low band spectrum (**5G**) and millimeterWave (**5G+**) services<sup>1</sup>, where each is available, for your capable devices.

**AT&T MOBILE SELECT – POOLED PLANS:** Prices are for service only. **Eligibility:** Available only to business and government customers with a qualified AT&T wireless service agreement and only for their Corporate Responsibility User (CRU) lines of service. For full service terms and conditions of service, see applicable wireless service agreement, including without limitation the Additional Service- and Equipment-Related Terms found at [att.com/abs-addtl-terms](http://att.com/abs-addtl-terms) (Business Agreement). **Monthly Service Charge Discount:** If you activate a smartphone that is purchased at full price, on a qualified installment agreement, on a month-to-month term, or bring your own, the monthly service charge for your Mobile Select – Pooled plan will be discounted by \$25 per month as compared to the standard monthly service charge for the plan that applies if you activate a smartphone that is purchased with a 2-year service commitment. If you qualify, the monthly service charge discount will appear as a credit on your bill. **Loss of Monthly Service Charge Discount:** If upgrading to a smartphone with a 2-year service commitment, you will lose any monthly service charge discount for that CRU line. **DEVICES:** Eligible devices sold separately. Installment plan charges and other device purchase costs are extra. A limit on the number of financed devices per wireless account may apply. **DATA:** For use in the United States (Domestic Coverage Area or DCA). Plans for phones and \$20/mo. and higher plans for data-only devices also include data usage in Mexico for compatible data-only devices (see Mexico Service Restrictions below). Additional or promotional data may not be available for use outside the DCA. **DATA OVERAGE:** If you exceed the total amount of data in your plan during your billing period, a pay-per-use rate of \$0.000009536 per kilobyte (KB) will apply. 1,024 KB = 1 megabyte (MB); 1,048,576 KB = 1 gigabyte (GB). **POOLED DATA:** Within each billing account number (BAN), all CRUs activated on Mobile Select - Pooled plans will be combined with any CRU lines activated on AT&T Mobile Select Priority - Pooled plans and any CRU lines activated on select other qualified Mobile Select plans that include BAN-level pooled data and the same data overage rate to create a "Data Pool." Every billing cycle, each CRU line first uses its plan's included data allotment (Data Allowance), if any. If a CRU line does not use all of its Data Allowance, it creates an underage in the amount of the unused Data Allowance (Under Usage). If a CRU line uses more than its Data Allowance (e.g., any CRU with a 0GB plan), the CRU line incurs Data Overage charges in the amount of the excess data usage (Over Usage). At the end of the billing cycle, AT&T calculates the total Under Usage and Over Usage amounts for CRU lines in the Data Pool and then compares the two totals. If the total Under Usage amount exceeds the total Over Usage amount (and the total Under Usage amount is greater than zero), the total Under Usage is allocated among CRU lines in the Data Pool with Over Usage (if any), resulting in per line credits on your invoice equal to each such CRU line's Data Overage charges. Any remaining Under Usage will be forfeited. If the total Over Usage amount exceeds the total Under Usage amount (and the total Under Usage amount is greater than zero), the total Under Usage is divided by the total Over Usage to create an allocation factor that is applied equally to each CRU line's Data Overage charges to determine each such CRU line's share of the total Under Usage amount, resulting in per line credits on your invoice to partially offset each such CRU line's Data Overage charges. For example, if a Data Pool has a total of 100 KB of Under Usage and a total of 1,000 KB of Over Usage (which means an allocation factor of 10%), then your invoice will show, with respect to each CRU line in the Data Pool with Over Usage, both (a) the CRU line's Data Overage charges at the specified Data Overage rate, and (b) a bill credit equal to 10% of the CRU line's Data Overage charges. Migrating CRU lines to different plans during a bill cycle may result in one-time prorations or other impacts to the credit calculation. If your organization's foundation account number (FAN) has multiple BANs, you may have one Mobile Select – Pooled plan Data Pool for each BAN under the FAN; however, CRU lines in one Data Pool cannot take advantage of another Data Pool's Under Usage, and each CRU line can only be part of one Data Pool at a time. AT&T reserves the right to limit the number of CRU lines in a Data Pool due to business needs and system limitations. **5G SERVICE:** AT&T 5G low band spectrum (5G) service requires a compatible plan and 5G device. 5G service is not available everywhere.
