The latest enhancements in the Premier experience

Premier enhancements support AT&T Fleet Management

Company administrators of AT&T Fleet Management solutions, such as Geotab devices, can experience a more customized way to track their vehicles in Premier.

The non-dialable numbers associated to non-standard and non-mobility Geotab devices can now be managed in Premier Online Care. This includes:

- Disabling transactions that are not supported for the vehicle type.
- Displaying vehicle information instead of device information.

Details about the fleet vehicle is provided on the **View Account Information** page in Premier Online Care.

These improvements make it easier and more convenient to support AT&T Fleet Management in Premier.
