

Unified Communications (UC)

A platform that combines voice, IP telephony calling and webconferencing, audioconferencing and videoconferencing, instant messaging (IM), and presence through a common user interface on desktop and mobile devices.

Unified Communications: Your Secret to Business Growth

Simplify

Enable near **real-time communication** and collaboration via voice or video across multiple devices.

Help reduce complexity and rev up productivity with hosted **PBX capabilities, audio** and **web** collaboration.

Centralized management and visibility across your communications platform.

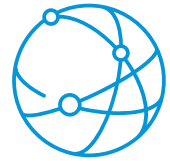

Accelerate

Respond to employees, customer and supplier inquiries with near **real-time meetings** across multiple devices.

Fixed and mobile deployments to help you respond to your changing business needs.

Integrate with **third party applications** for a consistent user experience across multiple devices.

Access

Connect in near real-time with clients and your team.

Host meetings from virtually anywhere.

Reach key decision makers around-the-world anytime.

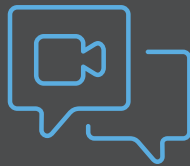

Integrate UC into your business via such tools and devices as:

Voice
(Fixed or Mobile)

Instant
Messaging

Audio/Video
Webconferencing

Presence

It's as if you're back in the boardroom, even if you're abroad. Manage your group and never miss a meeting with a potential client again.
