

Connect & Protect

NASPO ValuePoint Cloud Solutions 2016-2026

Government is where innovation happens.

Delivering services to constituents where they live and work, agencies are using technology to strengthen community connections. AT&T continues to spearhead the network revolution, driving innovation and investing more capital than any other US public company. By bringing together solutions that help protect, serve and connect—committed AT&T professionals are working with the public sector to identify and implement technology to transform the business of government.

Whether you're looking to easily collaborate using voice and video, help reduce cyber risks or improve service delivery to citizens, we can help. Our relationship with NASPO ValuePoint Cooperative Purchasing Organization (formerly WSCA-NASPO) provides a portfolio of competitively bid services to meet your current and future technology needs. This catalog provides an overview of those services and a specific email to contact an AT&T professional for questions or to place an order.

Inside

- 4 **COLLABORATE**
Simplify communications.
- 6 **SECURITY**
Protect your operations.
- 8 **CITIZEN ENGAGEMENT**
Optimize and engage.
- 10 **PROFESSIONAL SERVICES**
Utilize our expertise.

Unleash the power of collaboration.

What if you could simplify the complexity of your communications needs today while preparing for the future? We can help. AT&T can help maximize your network investment, reduce complexity and support your future growth.

Cisco Hosted Collaboration Solutions from AT&T offers the tools and technologies needed to consolidate your current infrastructure, maintain costs and take advantage of cloud based solutions. AT&T can help accelerate collaboration and productivity through a variety of feature-rich meeting products that can accommodate your conferencing needs.

We have developed trusted alliances that include **AT&T Video Meetings BlueJeans®** and **AT&T conferencing with Cisco® WebEx®**. These collaboration solutions allow participants to schedule, host and join meetings from a variety of supported devices including the desktop, laptop, tablet or mobile device. In addition, recording options let you accurately capture details to share with others. Whether it is a routine staff meeting, interactive forum or an informational webcast, AT&T has solutions that can take collaboration to a whole new level.

Help protect your operations.

Government agencies hold valuable, sensitive data including citizen records, financial information and procurement files. Incoming threats like DDoS, ransomware, malware and advanced persistent threats make safe-guarding that data a constant challenge.

In order to help protect your agency, AT&T recommends a holistic, multi-layered approach made up of a strategic mix of security solutions and technologies:

- **AT&T Premises-Based Firewall Service** is designed to block unauthorized access to your network while providing security to your users with remote access needs.
- **AT&T Managed Intrusion Detection/Intrusion Prevention Service** monitors your network for potential threats or misuse from internal and external sources and enforces security policies to decrease risk.
- **AT&T Cloud Web Security Service** is designed to provide comprehensive Web security including near real-time protection against viruses and malware, protection against compromised/hacked web sites and granular control of web applications.
- **AT&T Distributed Denial of Service (DDoS) Defense Service** is designed to block malicious packets in real time to help prevent impacts to your operations and legitimate traffic flow.

Improve citizen engagement.

The way we communicate and obtain information continues to evolve. Engaging customers with the speed, content and performance they expect can be a challenge.

AT&T Content Delivery Network Service (AT&T CDN) offers a faster, easier way to distribute digital assets while increasing visibility, control and customer satisfaction. AT&T CDN optimizes your content for mobile users and includes built-in security. This gives your end users the access, availability, and confidence they deserve.

For interactions that require a personal touch, **AT&T Hosted Contact Center Service** can help optimize your ability to engage with constituents. AT&T has the experts dedicated to assess your requirements and the relationships needed to design a solution to accommodate the hardware, software, network, security and applications needed to maximize efficiencies.

A man and a woman are sitting on the floor in a server room, looking at a tablet together. The man is wearing a white shirt and the woman is wearing a brown blazer. They are both wearing blue lanyards. The server racks are visible in the background.

Utilize our expertise to deliver your goals.

AT&T Cloud Professional Services has developed a Strategy and Roadmap program for planning that comprehensively addresses cloud adoption and identifies key impacts on applications, data center infrastructure, network, security, orchestration, automation, and operational discipline. Our proven methodology enables us to execute IT programs on-time and on-budget. Our consultants bring diverse experience and certifications across leading vendor technologies and platforms. This enables us to support multivendor solution integration and deployment.

AT&T Cloud Professional Services include:

- **Cloud Solution Planning Workshop**
- **Cloud Strategy and Roadmap**
- **Cloud Implementation and Governance**
- **Cloud Security and Compliance Assessment**

Work with a provider that knows government.

Today—more than ever—it is essential to keep pace with the rapid evolution of technology. AT&T has a proven track record of delivering solutions that support collaboration, improve citizen service delivery and help to protect your operations. We have the people, processes and products to advance your mission.
