Make your people more productive

Help keep your business connected using **AccessMyLAN** from AT&T™

Enable employees to work the way they do in the office - virtually anywhere, anytime with smartphones, tablets, and laptops.

Office walls are coming down thanks to a new generation of mobile devices that allow people to work from anywhere.

You've invested in smartphones, tablets, and laptops to make it happen, and signed up to a mobile data plan to support them, but unless you give your employees remote access to your office systems you are missing out on the business benefits of being mobile.

AccessMyLAN from AT&T is a mobile remote access solution that drives employee productivity.

For just

$9⁹⁹ per month

Users get secure access to:

Simple
Deployed, up and running in minutes.

Affordable
No additional equipment to buy. No support costs.

Powerful
Anywhere, anytime access to everything employees need to get on with their job.

Company documents

Business critical applications

Intranet services

A fully connected office experience from anywhere

AccessMyLAN from AT&T is a cloud-based solution that is simple to deploy, so you get the big business benefits of remote access without the big business cost or complexity.

- No setup costs
- No hardware investment required
- Support services are free
- No contract
- No limits - Scale up or down, to suit your business needs.
