Added Flexibility Means Saving Time and Money

AT&T's Enterprise On-Demand wireless program provides a unique set of services to give eligible companies added flexibility with sizeable wireless data-centric deployments. Whether your organization deploys wireless devices to customer-facing field operatives or to unmanned telemetry stations, this valuable set of wireless services can save you time and money. Our unique Enterprise On-Demand program offers the following features, which are all administered through a custom Web portal:

- Just-in-time Activation Control
- Flexible Rate Plans
- SIM Inventory Management
- Simplified Billing
- Detailed Usage Data
- SIM Tracking
- Usage Alerting
- Access to AT&T's Mobility Maintenance Center

AT&T's Enterprise On-Demand program gives organizations the means to control and administer their wireless device inventory.

Reach Market Faster with Device Certification

Reach market faster with your high-performing wireless devices. AT&T offers device certification and testing to confirm that your devices can be served on the AT&T wireless network. Catch and resolve problems before you mass deploy, saving you very costly efforts later.

Benefits

- Cost-effective data-centric deployments
- Flexibility and autonomy to control and administer your wireless services

Activate Devices When You Need Them

Enterprise On-Demand provides organizations the flexibility and autonomy to rapidly activate, deactivate or make changes to wireless services through a customized online portal.*

To activate your data devices, you can order and receive inactive Subscriber Identity Module (SIM) cards in bulk** keeping your supply-chain ready to deploy.

Single, batch and Web Services activation and service management options give you the flexibility and control you need to manage wireless services for your field service personnel or telemetry devices. You will receive the added advantage of detailed, electronic, daily and monthly usage data for all devices – plus, you’ll get a simple, consolidated printed invoice.

Easy Access to Training and Support

AT&T can also help prepare your organization to manage first-line support for your wireless data-centric implementation. The Enterprise On-Demand program will provide training for your organization’s central IT help desk, including how to utilize the custom portal site, so you can address most first-line technical issues in-house. And, your IT help desk has access to AT&T’s enterprise technical support.

Expertise, Platforms, Network and Alliances to Deliver M2M Solutions

AT&T is an innovative leader in M2M, with a proven track record in telematics, security solutions, monitoring, Supervisory Control and Data Acquisition (SCADA), point of sale, asset management and similar
M2M deployments. AT&T’s innovative service delivery platforms complement our network and expertise for a broad range of wireless data applications and industries. Keys to success include leveraging the AT&T alliance ecosystem, and using global standard, GSM-based 3G and 2.5G data services to connect users.

The nation’s fastest 3G network, the broadest international coverage of any U.S. wireless carrier and the nation’s leading high-speed Internet access and voice services. Comprehensive portfolio of mobile enterprise applications. Industry experts for planning and deploying mobile solutions.

**Notes**

*Single SIM activation typically occurs within minutes, while large batches process within the next four hours following receipt of completed online activation request from customer.

**SIM card order minimum – 50 cards at a time.

*3G not available in all areas.
