

# Wireless WAN Connectivity

Wirelessly Enable Your Enterprise Data Network

## Fast and Flexible

Wireless WAN (WWAN) connectivity from AT&T can help your business stay connected, reduce installation intervals and enable data transmission and transaction processing from almost anywhere business takes you. More than just a backup solution, WWAN is ideal for primary connectivity for lower bandwidth applications in situations where wired networks are unavailable or simply not feasible.

## Diverse

Whether you need to back up an existing network, open a branch office, or deploy remote applications, it's important that you have consistent network connectivity. Do you have a backup plan if your primary network goes down? WWAN can provide an ideal backup solution for mission-critical data. If a landline outage occurs, you have the added confidence of knowing that your network is supported by AT&T's wireless data network. Plus, with a WWAN solution, you can leverage your existing security options for network-to-network connectivity.

## Economical

WWAN connectivity makes network connectivity not only feasible, but cost-effective. New locations can be connected to your corporate network, and existing sites can be moved, without the typical landline installation intervals or added costs.

AT&T can wirelessly enable almost any part of your business, such as:

- Point-of-sale locations
- Kiosks and ATMs
- Vehicles
- Branch offices
- Remote measurement and monitoring equipment

Wireless WAN Connectivity from AT&T is the affordable way to improve the flexibility and continuity of your company's network, leveraging the largest national high-speed data network.

## Challenges

- **To get the connectivity you need where and when you need it**
- **To maintain secure and reliable network connectivity**
- **To build a cost-effective solution**

## Solution

**Wireless WAN Connectivity from AT&T provides diverse, cost-effective backup for your data applications, quick deployment of new applications, remote locations or mobile workers and consistent network connectivity**

## Important Information

WWAN service requires an eligible AT&T business or service agreement and, with respect to each end user, activation of an eligible AT&T Business Connect plan on a compatible device. Business Connect plans are not intended for Laptop or smartphone access. For Laptop or smartphone access, see DataConnect plans. Terms of service will vary based on selected devices and service plans. Coverage not available in all areas. Coverage is subject to transmission, terrain, system, capacity and other limitations. Service may not be accessible at all times. Availability, security/privacy, speed of delivery and timeliness of information are not guaranteed by AT&T. AT&T strongly encourages the use of compatible customer-provided and/or third-party security solutions, such as virtual private networks (VPNs). Additional hardware, software, service and/or network connection required. May require separate purchase from third party and be subject to applicable third-party terms and conditions. Additional fees, charges, and restrictions. Service subject to applicable business or service agreement, service plan brochure and coverage maps. Offer subject to change.
