Scale with ease to meet dynamic business needs. Add new communications features on the fly. As your business grows, AT&T makes it easy to stay connected and productive. Reach for the AT&T cloud and rethink what’s possible – while you also bring the cost and complexity of unified communications down to earth.

AT&T cloud services transform the way you deliver communications services to your organization. Unlike on-premises solutions, the unified communications “cloud” gives you access to virtual resources over the global AT&T network. You purchase communications as a service, not as an asset, and AT&T delivers those services where and when you need them.

This makes scalability easy. As your business grows and changes, so do your communication needs. AT&T keeps this growth lean, efficient, and effective – not to mention, easy.

AT&T Unified Communications Services (AT&T UC Services) integrates multiple communication and collaboration tools such as IM/chat, email, VoIP calling, web/audio and video conferencing, voicemail, unified messaging and mobility, with presence, behind a single user interface. Accessible from mobile phones, desktops, laptops, and other wired and wireless devices, AT&T UC Services enables real-time communication and collaboration, regardless of your location or device. Work with team members around the globe on desktops, laptops, landlines, smart phones, and tablets at the same time – almost anywhere or anytime.

**AT&T UC Services**

AT&T UC Services provides easy to use, high quality, complete unified communications cloud solution comprised of two key components:

- PC/Mobile client application
- Fixed-voice (IP Telephony) component, AT&T UC Voice

These services, together with network transport, get you everything you need to unify your communications – conveniently delivered over the secure and reliable AT&T network.

AT&T UC Voice, provides easy to use high quality IP Telephony (IPT) from the AT&T cloud. With AT&T UC Voice, there’s no need to buy new PBXs and software licenses, or renew maintenance contracts. AT&T UC Voice employs the Cisco Hosted Collaboration Solution (HCS) platform as the core of this service and comes complete with a full suite of advanced IPT features, management services and tools to help ensure you provide the best service to your customers, employees and partners.

Offered as a service, AT&T UC Voice helps you control costs and eliminate unpredictable expenditures. Capital costs can be kept to a minimum with a convenient and reliable monthly subscription-based price model.

---

**Potential Benefits**

- Preserve existing investments – no need to “rip and replace”
- Easy to manage solution that integrates with legacy TDM/IP PBX systems
- Avoid capital investments by procuring unified communications as a Service; per-user, per month
- Avoid infrastructure, maintenance and upgrade costs
- Integrated mobility functionality such as feature extension and single number reach
- Delivering single point of responsibility for carrier-grade quality

---

**Features**

- Cloud-based IP voice service
- Rich voice capabilities including:
  - Single number reach
  - Voicemail, unified messaging
- Scalable services
- Built-in security and redundancy
- Virtualized infrastructure monitored 24x7x365
- Optional UC client enhanced with business grade telephony features
And even more certainty can be found in AT&T’s multi-vendor support. Because no single vendor provides all the pieces needed for a complete unified communications solution, AT&T brings the best components together and provides a single point of contact for your communications services.

**Tiered Solutions**

AT&T UC Voice, as part of AT&T UC Services, offers numerous features that increase productivity and provide functional resources to your team members around the world. Businesses of all sizes benefit from the valuable services offered by AT&T UC Voice.

You can mix and match from the following packages to select the solution that best fits your business’s unique needs.

**Benefits for your Business**

**Simple**
- One point of contact for design, implementation, service additions, upgrades and ongoing support
- Easy migration pathway from legacy voice systems to advanced unified communications as you are ready
- Mitigate technology risk and avoid obsolescence

**Fast**
- Scalability and flexibility to meet your changing business demands

**Economical**
- Predictable monthly fees
- Cost effective “as you need” access to features and functionality

**The AT&T UC Advantage**

AT&T serves top global corporations with an established network supported by a fully validated end-to-end architecture. Multiple levels of resiliency and built-in geographic redundancy with widely dispersed data centers virtually guarantees service availability and high voice quality. Having AT&T on your team helps ensure top performance and reliability, while also reducing IT department complexity, allowing your company to focus on the business at hand.
