

**About Bangalore (BK11)** AT&T helps businesses connect to their customers, suppliers and partners through our highly secure and reliable data centers. Our data centers provide high bandwidth and low latency connections through the AT&T network, one of the most powerful and advanced IP/Multiprotocol Label Switching (MPLS) networks in the world. For decades, we've helped define how the data center industry operates. With the extensive global coverage at our own data centers (in locations like Amsterdam, London, Hong Kong, Singapore and Sydney) and alliances with other major data center operators, AT&T offers collocation availability at more than 300 facilities in 16 countries.

Bangalore is one of Asia's fastest growing cities, and India's fifth largest city. Situated at an altitude of 920 metres above sea level, Bangalore is the principal administrative, cultural, commercial and industrial centre of the South Indian State of Karnataka. The IDC is in the prime business district / Export Promotion Industrial Park (EPIP) of Whitefield in East Suburban Area of Bangalore.
