About Miami (MIA1)  
AT&T helps businesses connect to their customers, suppliers and partners through our highly secure and reliable data centers. Our data centers provide high bandwidth and low latency connections through the AT&T network, one of the most powerful and advanced IP/Multiprotocol Label Switching (MPLS) networks in the world. For decades, we’ve helped define how the data center industry operates. With the extensive global coverage at our own data centers (in locations like Amsterdam, London, Hong Kong, Singapore and Sydney) and alliances with other major data center operators, AT&T offers colocation availability at more than 300 facilities in 16 countries.  

Miami is a seaport city at the southeastern corner of the U.S. state of Florida and its Atlantic coast. As the seat of Miami-Dade County, the municipality is the principal, central and most populous of its metropolitan area. With a population of around 5.5 million, Miami boasts the eighth-most populous metro area is the fourth-largest urban area in the United States. Miami is a major center, and a leader in finance, commerce, culture, media, entertainment, the arts and International trade. The city has the third largest skyline in the U.S. with over 300 high-rises. Downtown Miami is home to the largest concentration of international banks in the United States, and many large national and international companies.
