AT&T Data Center Brief

About Paris (PAR1)
AT&T helps businesses connect to their customers, suppliers and partners through our highly secure and reliable data centers. Our data centers provide high bandwidth and low latency connections through the AT&T network, one of the most powerful and advanced IP/Multiprotocol Label Switching (MPLS) networks in the world. For decades, we’ve helped define how the data center industry operates. With the extensive global coverage at our own data centers (in locations like Amsterdam, London, Hong Kong, Singapore and Sydney) and alliances with other major data center operators, AT&T offers collocation availability at more than 300 facilities in 16 countries.

Paris, located in north central France, is both the country’s capital and most populous city. It is referred to as the “City of Light”, both because of its leading role during the Age of Enlightenment, and more literally because it was one of the first European cities to adopt gas street lighting. Today, the city is a major rail, highway and air-transport hub, served by two International airports. The Paris Region is France’s leading region for economic activity and the center of French politics, traffic and culture.

LOCATION
InterXion, 20 Rue des Gardinoux, Bâtiment 237, 93300 Aubervilliers, France
From Airport: 10 miles* from CDG Airport
Location: Located just off the Paris Ring Road in Aubervilliers
Parking: On site parking

PROFILE
Data Center
Overall: 58,787 sq. ft.
Raised Floor: 3,351 sq. ft.
